Thread: [\[sell\] CyberGate Project - PRIVATE Version \[sell\]](#)

CustomiZer - February 25, 2010, 10:39 am

Hello HackForums,

Everyone must be familiar with the most stable RAT which is available currently. Yes I'm talking about the CyberGate RAT

[+]Announcements :

jonhyk :

As i announced a few weeks ago CyberGate is going semi private.

There will be a public release in the next few weeks.

This public release will have restrictions.

Only private releases will be fully featured. In order to do this obviously private versions will be sold.

This package will grant access to CyberGate customers/private board, access to fully featured CyberGate versions and future CyberGate updates and support.

I have decided that instead of working on CyberGate FUD versions, the same result its easier to achieve with a 100% compatible and specially coded crypter which will give the FUD'ness customers expect for this application.

This crypter is being coded as of now by a well known person in the scene that is going to help me with this great project. He is probably the greatest crypter coder >> BUNNN (coder of Fly Crypter)

This partner ship will gather a great crypter and a great rat, put them together to give this project obviously a Go and to make it a serious project.

It's obviously easier if we get 2 people involved in this instead of just 1. Thas was the main idea behind this partnership.

Notes:

- Please note that by 'CyberGate fully featured private versions" i dont mean they will be FUD. FUD'ness is achieved with crypters and they are available on packages Silver, Gold and Extreme.
- Crypter is being coded by BUNNN. i will add some screenies soon everything is set properly.

Notice some people will have old free version noneed to update.. and u cant limit the old one.

Vexira - February 25, 2010, 1:03 pm

Don't expect many sales at those prices, simply outrageous price \$50/stub.

Guess remember he is only a advertiser, he has no control over price etc !! But i agree u should tell jonhyk that its a little over priced..

.Twilight. - February 25, 2010, 1:12 pm

You're rat is not the most stable and nor it will ever be. It's good but not that much.

Live with it there are some better and always will be, life sucks

p.s.

you're prices are funny

xvisceral - February 25, 2010, 1:16 pm

that is not his email

his is jonhyk@live.com

ODDSAC - February 25, 2010, 1:19 pm

yeah, them prices wont get many people

.Twilight. - February 25, 2010, 1:21 pm

Of course they won't

There are free rat's much more stable than this and actually they dsn't cost 450 usd

ProfoundZeus™ - February 25, 2010, 1:30 pm

Its totally overpriced. And BUNNN is written with 3 N's and not two.

jonhyk - February 25, 2010, 5:22 pm

i confirm that is my email and those r the prices.

who ever wants it, thats how it is. who ever doesnt want to spend a dime, well theres the free better this, better that, the best this and that that you guys can always use.

i dont discuss prices with anyone.

that being said.....

thanks icyberhack

have fun

private version may be.

p.s.

your grammar is funny.
it's your, not you're.
you're = you are

so you just said "YOU ARE PRICES ARE FUNNY"
"YOU ARE RAT"

Nice, nice.

This RAT comes with quite a lot of features, one of the best GUI and comes with a unique crypter compatible with the RAT especially coded by BUNN.

This is not a cheap 1 \$ per stub which remain FUD for a week or so. You will get unique FUD stubs which will alst around 6 months or so (thats as far as I cab guess). However if you feel the crypter is not worth you can just buy the RAT without crypter and use your own crypter.

I'm sorry, I've corrected it.

TheBlackHat - February 25, 2010, 9:15 pm

How much is it without the crypter?

CustomiZer - February 25, 2010, 9:17 pm

Check the packages >> It is the bronze package: 100 USD

0-day - February 25, 2010, 9:38 pm

Maybe like 35-50 for the bronze package would have been nice, but i guess not good luck selling this man. And besides Albertion's RAT is coming out so most people who are willing to buy a RAT would probably go for that since its much cheaper.

Name them.

almaalma - February 26, 2010, 12:40 am

Wow. It's a little bit overpriced.
LOL LOL LOL

iDope -- - February 26, 2010, 12:55 am

EPIC rates!

I am DAMN sure no one from HF is gonna buy this (except for me maybe)

:P

Anyways, good luck selling!

Think about the rates once again!

CustomiZer - February 26, 2010, 10:01 am

The prices has been reviewed and updated.

Prices of some plans has been reduced after talking to BUNNN.

They are much more resonable now + unique stub generator with all plans (except bronze)

Check plans for more updates

hav0k - February 26, 2010, 10:21 am

Tbh, all i've seen is Market Place bashing.

jonhyk - February 26, 2010, 11:45 am

its not just me. theres more ppl involved in this so to set a price everyone must agree....thats why its hard to set prices.

we all talked about it and we think these r the reasonable prices for all this.

Vexira - February 28, 2010, 9:27 am

Silver seems decent, might buy next week :P

..xX[ThunderStorm]Xx.. - February 28, 2010, 9:53 am

Hey dude i dont think you'll get any of the sales here with these much high prices xD

jonhyk - February 28, 2010, 4:30 pm

lol

u would be amazed if i would show the results.....mate there r al kinds of ppl.

there r ppl that wants crypter for 1 dollar or a crypted stub and gets backdoored and a fud crypter for 2 days or u might want to spend some money and get serious tools.

Prospect - February 28, 2010, 4:43 pm

Damn it man, I like Cybergate. No way I can ever afford myself to buy this... I'll just stick to the old version then

I am fool - February 28, 2010, 6:19 pm

Spy-Net and xversal.

H3x0S - February 28, 2010, 6:31 pm

I don't think that Cybergate is worth more than 30\$, and with lifetime support i would pay 45\$ for it. BUNNN's crypter is worth 34\$ with lifetime support, so $45\$ + 34\$ = 79\$$. I would maybe buy that for 80\$ with lifetime support for both products as I am looking forward to buy BUNNN'S crypter. I appreciate your work guys, but it's just not worth all that money!

Well it comes with a stub generator and I can say the crypter is worth much more. As for cybergate there is a lot of work put in by jonhyk and it comes with lifetime updates so it is quite worth.

Well that maybe an assumption.

Crazy Shit - April 17, 2010, 12:18 pm

FYI:

CyberGate is being partially recoded, due to a decision to redesign in order to achieve it's Goals more efficiently.

There will be many additions, one of the most important being that the Server's File-size will be much smaller.

Also, the another great addition is that CyberGate will have FUD versions available to be purchased, which means no more additional Crypter in Package.

There will always be a public releases, however it will not be FUD and the Server will most likely be much bigger in comparison to the private release.

Stay tuned for more information on the matter in the coming weeks.
