Thread: [\[AIM\] Yoshistr AIM Brute Forcer & Stealer \(\\$20\)](#)

**Yoshistr** - February 25, 2010, 10:59 am

Yoshistr AIMBrute & AIMStealer (\$30 Only \$20!)

AIM Brute forcer for cracking AIM passwords

Works at a fast rate (200+ passwords tested per minute) Always finds a correct password and never shows an incorrect password as correct

Quick and easy to use, simply load your password file and enter the screen name to begin cracking

AIMStealer is a program that will log stored AIM passwords on the remote machine and send you an email containing them (works with latest version of AIM)

AIMStealer includes a free program to get the text version of the password

\* Everyone uses the Remember Me feature of Aim for quick log on, now you can capture the password normally hidden even remotely!

(If you have already purchased AIMBrute please PM me so I can send you AIMStealer as well, also a Trial version of AIMBrute is available upon request so PM me if interested.)

yeah but what i must write in "screenname"

**Silkie** - November 3, 2011, 11:30 pm

While this looks like it could be useful, your rep makes me think scam. What AIMS have you cracked? What does the trial entail that the actual product does not? No proxy support?
