Thread: [What language are most RATs/trojans/bots programmed with and](#)

killzer - February 25, 2010, 1:45 pm

what language would you suggest for someone who wants to program RATS/trojans/bots.

minimal?st - February 25, 2010, 1:46 pm

Delphi, but that takes some time to learn.

Thrill - February 25, 2010, 1:47 pm

C++ fucking cocks too short cunt

Da Loser - February 25, 2010, 1:50 pm

Not To Mention Delphi Is Like £1000 >:|

Piratez...Yeargh

wernesgruner - February 25, 2010, 3:01 pm

C++ <3 <3 <3 <3

And it makes really good bots.

Evil ShiT - February 25, 2010, 3:02 pm

Well trojans are coded in pretty much all languages.. Top three are VB6, Delphi, and C++

iSam - February 25, 2010, 3:04 pm

The language of love.

RooR ToKe - February 25, 2010, 3:05 pm

Wrong section buddy this forum section is for discussion of botnets.

Reported.

b4Tm4n - February 25, 2010, 3:13 pm

Copy Paste FTW

Reported. Dude who the fuck is this wanna-be moderator, seriously this kid goes around in every tread pretending hes the shit and he owns the fuckin site, stop being something ur not kid

wacked - February 27, 2010, 7:01 am

The "best" are in C and ASM.

But if you know one language use this one cause YOU will get the best results in this language.

Man i saw some C sources from ASM guys and it was just horrible

Morphine_Injection - February 27, 2010, 12:03 pm

C/C++ is good

VB some times Rocks :)

-XxxV1r0j4NxxX- - March 5, 2010, 11:44 am

most trojans capable of compromising people's pcs are coded in:

1st=delphi

2nd=c++

3rd=vb6
