Hello HF,

This tutorial gonna be very easy and will make your timeline amazing by uploading gif images as your cover page. ITs awesome.

?? So lets start ??

Ok here are the steps you need to follow

1- Go to google.com and download any gif image, for my case i am going to use this website - <http://www.stupidgifs.com/>

2- Ok so now when you find a good gif image or your cover page , you need to upload it to any uploading site. I use [.com\]\[censored\].com](#) and [imageshack.us](#) to upload. Keep the page open, as we need some stuffs from here.

3-Open a new tab and Now go to [facebook.com](#) and login .

4- Ok after logging in, make a new facebook page, name it any (doesnt matter)

5- Now go to this link [CLICK HERE](#)

6- Click - go to app and click add static html to a page. Choose on which page you want to install static html.

7- After choosing the page, go back and open that facebook page on which you installed static html you will see something like this

8- Now click on static html page and it will take you to new page, there you will see written public content

9- now you need to go back where you uploaded image there you will find you html code after uploading

```
