Thread: [\[SOLVED\]Pc making little buzzing sound when working on him\[SOLVED\]](#)

Uncol Dolan - September 23, 2012, 10:10 am

So when pc is idle i don't hear that Buzz, its short and not loud, so i don't think its MB. I only notice this when i am scrolling pages or switching tabs... Also i only hear it when i lower my PC fan speed. Any idea what could that be? Its annoying -.-
SOLVED

It was power saving option in BIOS. If you have same problem, disable power saving or something like that and it will stop buzzing -.-
