Thread: [Help PSD image to Vector image Indesign/Illustrator](#)

gamerdd - September 24, 2012, 5:27 am

Hello people!?

Can somebody help to convert an PSD file to an Vector file like for Indesign or Illustrator? I'ts my own company logo so it would be nice if somebody can do it ;)

If i get the files I will referrer to your site or give you a small service.

You can even create non psd file into vector image with Illustrator.

Open the image and click on live trace above. Then click on expand. Cheers.

It will never be the same quality if you do that. Also, it doesn't trace the parts as you wish, but separates a lot of shit you don't even want.

@OP: Create it yourself in Illustrator, something you should have done in the first place if it's a logo.

Yes that is my problem....?

Can somebody help me with it or do it for me ?
