I don't know what you are talking about. I don't remember where I downloaded it from. I just have it & thought I would give it to the HF community.

Yeah, Aeonhack created this tool. Credits are given in the OP.

I didn't make this. I've never even seen it before. Thank you for posting though. :)

Oh, really? Shit. I thought you created it. Anyway, you can still have credits, because you made the themes. Lol.

Some themes are not made by him but they have the themebase of him. So, some other credits should be given as well. Not only aeonhack...

I will look through them & give them credits.

Edit: All done. Check the OP.

This has just been posted here already

<https://hackforums.net/showthread.php?tid=2642775>

Why post something thats already here, like page 2 of this forum atm ?

Thanks

You also forgot to give credits to the owner of this tool.

arun9020 is the one that created and released this tool

Thanks

I did not see that, sorry. Also, it says repeatedly in the thread "Credits go to respected owner". That

means that he did not create it. -.-

Police 10-13 - September 24, 2012, 8:59 am

The same exact thing was created and released on this website, If the OP created this, than its just a rip from the original one. He just changed the theme & the look.

Aeonhack didn't make it either :/

Yes he did create it, he means credits go to the theme owner.

Quote:Here is my second release. VB.net theme manager with 42 pre loaded themes.All credits of themes goes to resprctive owners

Look at the BOLD test :)

Thanks

No one realizes that the first thread with this in it (which was posted above) the link is dead, so this is the thread to go to if you you want the Aeonsoft theme manager, so this was indeed a good post regardless of what anyone else says.

KingCobraXD - September 24, 2012, 10:04 am

Obviously, Aeonhack didn't make this tool. He's got way better tastes in terms of GUI. Thanks for sharing though.

Thanks man. I have also given credits to the original poster in OP.

Isn't this like the 800th time someone has made a theme repository/database thread? Why does this keep happening?

If it is yours, thanks for making it. It is a really good idea, because now that I have it, I do not have to Google the theme to get it. Lol.
