Thread: [\[BATCH\] Batch Virus Creator \[DIRECT LINK\]](#)

iZeki - September 24, 2012, 7:07 pm

I found this lovely site called <http://hackingncrackingtools.blogspot.ca> and I think the people in it are from anonymous or something. One of the programs that was on their site was pretty dang cool and I thought I'd share it with everyone

Here is a screenshot:

They do have other things on that site. I'd recommend you check them out

Download link:

If the download link goes down (Usually does)
then PM me and I'll upload it and fix the link

A batch file isn't considered a virus as it doesn't self propagate, it is simply a file that could be harmful. If your local to the machine, or have remote access to a machine, it can cause some set back for sure.

Batch is pretty ineffective locally compared to even hirens boot cd though.

I didn't come up with the name. The people at www.hackingandcrackingtools.blogspot.ca did

(Sep 24, 2012 08:59 PM)AmateurCoding Wrote: [\[CITE\]](#) You do realize they can't be "from" Anonymous, right?

Anonymous is an idea, not the group of people who believe in it. (Unless you're talking about anonymous as in the dictionary meaning.)

OT: The program is pretty useful if you don't have time to make a destructive file yourself. I said I heard they were from the person that showed me the site. I have no idea

Anyway, it's not important I don't want to start an argument.
You can correct my mistake but you don't have to be a dick about it

Thanks for giving this out its a preety cool share and im sure some people will fuck up there comps trying to test it on themselves (hehe) but thx again! Also guys why cant you just be thankful for him releaseing it dont be a dick correcting him anonymous is a idea not a group?...cmon..you can interpret it how ever you like

Thx Again!

fullmaxchill - March 22, 2014, 1:03 pm

thanks for the share, link not work

?h?S??C????? - March 22, 2014, 1:07 pm

this thing looks sketchy as fuck, and its from a blogspot page. 0/10 would not download.

Dr.TimeBomb - March 22, 2014, 1:20 pm

Crap.... you can at least add a compiler to "*.exe" using btexx dipendency and a UPX ..

Niely - March 22, 2014, 1:24 pm

Program and that site looks really nice! :)
Thanks bro!

But for me, all the download links on that site doesn't seem to work. :P

METALSLUG - March 22, 2014, 1:46 pm

Dat grave dig!
I have used this tool before though, back in the day. it was great :) nice pranks

This is a legit tool, but old as FUCK!

Enjoy.

Brought back some memories when I opened up this thread. LOL
