Thread: [Task Manager Disabled By Administrator](#)

MS.Points! - September 25, 2012, 1:13 pm

Alright, i used to be into ratting and when i clicked my server to try it, it disabled my task manager..

I tried to find a tutorial to re enable it, but no luck.

Would anyone help me out?

Regards,
EZ.

Try this tool: http://vulcantools.net/index.php?mod=free_tools&tool=System_Scanner

It has the option to re-enable task manager.

MS.Points! - September 25, 2012, 1:16 pm

When i try to click the download link, it says not found.

You should be able to run a scan with malwarebytes or if the rat was darkcomet darkcomet remover would do the job.

camdenk1234 - September 26, 2012, 6:51 am

Try this tool:

Virus scan:

<https://www.virustotal.com/file/7405280647d5fd60e20ef939376e80235da93031001a33e6e393793080412db4/analysis/1348134990/>

Download: <http://www.mediafire.com/download.php?eimmv2xpzn4k7xn>

What kind of RAT was it...? If it was Darkcomet just use Dark comet RAT Remover.

kivik - September 26, 2012, 8:16 am

hello

if you win seven

try this <http://7-quick-fix.softonic.it/>

<http://xp-quick-fix-plus.softonic.it/>

BlueRey - September 26, 2012, 11:27 am

start -> run -> regedit -> HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Policies\System -> change the value of DisableTaskMgr to 0.

and done.
