Thread: ["RR CPanel/WHM Cracker" cpanel/whm cracking script](#)

mani - September 25, 2012, 9:17 pm

Hello

i am going to share "RR CPanel/WHM Cracker" i.e cpanel and whm cracking script in php
this script has following features

Download link

--==[[<http://www.mediafire.com/?an4hmdzg1fnnwfc>]]==--

1.cpanel login panel hyperlink facility

those who are new to cpanels and dont know where to use cracked usernames and password
can use this :)

2.store cracked cpanel/whm usernames along their passwords in a file on that server

when cracking process will start , a file will create and those user which got cracked, will store in
that file

cracker will show the link for that file once you will start cracking process

3.cracking status

cracker will show you, which user is going under attack and how many passwords has been
checked for that user .

dont forget to run php.ini script in the shell before clicking on username extractor
