Thread: [\[NO POST/PM\] This should help boost your earnings](#)

Pops - September 28, 2012, 9:43 pm

Hi guys,

You know how there's all those YouTube videos with fake Facebook and Skype hackers? Well with the help of [Dolan.](#), I managed to put together these fake GUI's. Here is what they look like

Skype Hack

Facebook Hack

As you can see, they look really nice.

Here is the download link to the sources: <http://adf.ly/DH81f>

You will need to compile them in VB 2010.

Now incase you haven't already figured out how these will boost your earnings, here is what you need to do:

- Make a video using them
- Upload the video
- Make a 5mb or so .txt file and put it in a .zip
- Upload the .zip to your PPD/CPA site

That should boost your earnings quite a bit.

I hope this helps you guys!!!!

My 10 years old brother should not believe thes programs are true.
Imho fonts are too big and they look unprofessional.

This section is for discussion of Surveys, not posting survey links nor referral links.

Use [this](#) section for that.

Use [this](#) section for that.

This thread has neither.

Your argument is invalid.

Yes, but 99% of YouTube users are illiterate and will believe anything.

On the Facebook one it says account hacked and then shows a password.

On the Skype one it just says credits added.
