Thread: [\[HOT\]\[Tutorial\]Darkcomet Legacy 5.4.1 setup + download\[Tutorial\]\[Video Included!\]](#)

Op-Jax - September 29, 2012, 4:11 am

Notice THIS IS NOT SAME AS 5.3.1 THIS REQUIRES THEM TO RUN THE FILE AND GIVE U THERE IP AND STUFF , ITS LIKE TEAMVIEWER BUT BETTER!

Hello everyone... so today darkcoder officially released darkcomet legacy beta! i will show u how to setup it up :D

Obviously its like darkcomet but ... the diffrence is this isnt a rat the slave must accept and have that window open so u can control it.. u can use that at your home.. not to infect people! OK so lets start :)

1-Ok so first of all download it from official link posted by darkcoder:

<https://kat.ph/darkcomet-rat-legacy-beta-1-t6696057.html>

2-So.... once u download.. Open control module on the pc you want to control ... you should see something like this :

3-Ok so now first of all you need a no-ip... dont have one? You should find a tutorial on how to do it in this section :) ok type your no-ip in the ip/dns slot :D

3-Now you need to forward a port.. cant do that?! pm me.. .once you do type that port in the port slot :)

4-Now after you do that.. its time to type a password! the password will be used to make sure no1 can control ur slaves/computers other than you... try to make it hard.. and remember it becuse you will type in darkcomet_b!

5- now just use the display id to know wich computer is that and tick "active offline keylogger"

6- now click activate and open darkcomet_b from the same folder :)!

Picture:

7- ok now go to socket/net and add the port u used!

8- now after that click on the darkcomet text on the left corner and choose client settings!

9-ok now in general settings you will see something called "traffic encryption merged key (password)" there you type your password you used before!

10-now close that window to see your connection!

Video:it will zoom in in about 5 secs dont worry xD watch in fullscreen and 1080p for highest quility:[Video: http://www.youtube.com/watch?v=oDH_NExuyBw]

Credits for this program to : DarkcoderSc

I am not responsible for how you use this! thanks, please comment to keep this active! ?

?exy - September 29, 2012, 4:42 am

Thanks for the tut Bro <3

Really Helpful. :)

Op-Jax - September 29, 2012, 4:43 am

Your welcome :D i am glad it helped you :D :D???

?ntei - September 29, 2012, 4:48 am

Hey, sadly I require 10 post to PM you, but could you help me with port-forwarding on a Verizon router?

Op-Jax - September 29, 2012, 5:11 am

(Sep 29, 2012 04:48 AM)itschrisk Wrote: [\[CITE\]](#) Hey, sadly I require 10 post to PM you, but could you help me with port-forwarding on a Verizon router?ok .. i will pm u right now. u can reply right?

?ntei - September 29, 2012, 5:25 am

Can't reply, let me try to get the couple more posts I need.

Op-Jax - September 29, 2012, 6:08 am

(Sep 29, 2012 05:25 AM)itschrisk Wrote: [\[CITE\]](#) Can't reply, let me try to get the couple more posts I need.

helped port forward xD any1 else needs help PM ME! :D

?ntei - September 29, 2012, 6:08 am

THanks man really helped on the Portfowarding! pm dat link lost it....

Owl City - September 29, 2012, 6:10 am

I appreciate your effort in this tutorial, but just a question; what's the difference between this and TeamViewer? :s

Op-Jax - September 29, 2012, 6:13 am

(Sep 29, 2012 06:10 AM)Dimsim1234 Wrote: [\[CITE\]](#) I appreciate your effort in this tutorial, but just a question; what's the difference between this and TeamViewer? :s

well .. this got a password stealer etc.. like u can use this in a school to control ur students comps.. or all comps in lab (just an example LOL Imfao) it got more things than teamviewer... but if u want only remote desktop.. go for teamviewer i guess??

Nixing - September 29, 2012, 6:36 am

Thank you for making this tutorial and for your time, big Vouch!

Op-Jax - September 29, 2012, 6:38 am

(Sep 29, 2012 06:36 AM)Nixing Wrote: [\[CITE\]](#) Thank you for making this tutorial and your time, big Vouch!

thanks for the vouch , hope it helped u D:

NicoHD - September 30, 2012, 1:37 pm

i did like u done and everything is fine just 1 question what i have 2 send 2 other people to get the trojan on their computer?

bziper69 - September 30, 2012, 2:22 pm

Seems to be pretty nice, i will try
Thank you bro

Grin - September 30, 2012, 2:29 pm

Lol. I have a sense a slave accepts a rat by downloading the file you send them.

Op-Jax - October 1, 2012, 7:12 am

(Sep 30, 2012 02:29 PM)Grin Wrote: [\[CITE\]](#) Lol. I have a sense a slave accepts a rat by downloading the file you send them. o.o wat do u mean lmao... O_O if u need to infect people .. this thread is not for u xD cuz this 1 is a legal 1.. thanks :)??

Lenyx - October 1, 2012, 8:03 am

Damnit, when I opened my DC this morning and saw my No-IP automatically updated I figured he continued the project. Went onto the site, found that legacy one.. Got a bit disappointed when I found out that now it was only about monitoring, not infecting, since I can't really get people to install and set that module up if you know what I mean.

Michael Myers - October 1, 2012, 11:04 am

Thank you very much Nice tutorial for me

Op-Jax - October 1, 2012, 1:34 pm

welcome everyone!! took me much to do this.. thanks for posting! need any help feel free to pm me!

Bendog - October 1, 2012, 2:22 pm

How do I get teamviewer and how does it work?

komatic - October 1, 2012, 5:24 pm

Thx ! Might be useful to set up this so good RAT on my dad's computer in order to get all his problems solved !

JamesMinson - October 1, 2012, 6:04 pm

I'm having trouble port forwarding could you please help me my skype is jameshellzyeah and my email is themlggamer11@gmail.com I can't PM on here :(please help.

Op-Jax - October 1, 2012, 8:38 pm

thanks for comments guys...for teamviewer search youtube and for port forward pm me!

got-barcode - October 5, 2012, 10:44 pm

nice work man , how do i make my .exe file to put on other computers ?

aevanfile - October 6, 2012, 2:47 am

Anyone can add me in skype ? its hard when in the portforwarding part and im using Huawei D100 Router

Skype:aevanfile

(Oct 5, 2012 10:44 PM)got-barcode Wrote: [\[CITE\]](#) nice work man , how do i make my .exe file to put on other computers ? You need to bind it to another file or spread it in other websites

nicedog - October 24, 2012, 7:17 am

s'so you put that 'porn' in the port?' xDD

Aire-one - November 3, 2012, 11:03 am

I need help ! How to infect people ?? :'(

scapecoolboy - November 3, 2012, 3:26 pm

omg i have kim k as a slaveomg .. im about to cum

nafox - November 8, 2012, 1:29 pm

Errr umm, What exactly are you suppose to spread??

RetiredDelete - November 11, 2012, 5:49 pm

Please answer me, my darkcomet module doesnt work? it wont launch it just cant find the file

Vats - November 16, 2012, 10:21 pm

Nice help.

Keep up the good work!

Good day.

slyone - November 17, 2012, 11:38 am

Hi guys

Trying to understand the darkcomet rat program.

This has helped thanks

Back to reading :)

Screamz91 - November 17, 2012, 11:58 am

thank you this is really helpful! great job

Amazighi-Hkr - November 17, 2012, 2:01 pm

very useful tut mate

thx a lot ?

ankurtrdevil - November 18, 2012, 6:35 am

Awesome work dude thanx.... :) ? ?

Bam10 - November 18, 2012, 8:17 am

thanks for the Video, but I prefer 5.3.1.

M4tr0MS - November 25, 2012, 12:00 pm

What to infect other pc?

(Sorry for my english, im italian).

exoddus666 - December 5, 2012, 12:23 pm

Yeah I'm kinda missing the "Server module".. Where can it be found??

BoomShot - December 5, 2012, 12:27 pm

(Dec 5, 2012 01:23 PM)exoddus666 Wrote: [CITE](#) Yeah I'm kinda missing the "Server module".. Where can it be found??

It's because this is the legacy version. It is a legal RAT like TeamViewer.

Use DarkComet 5.3.1 instead: <https://hackforums.net/showthread.php?tid=2658152>

exoddus666 - December 5, 2012, 12:35 pm

I tried that but can't open the rar file.. :(

hackbyme - December 7, 2012, 8:35 am

Hi, i need more postes to pm u but how do i find my no-ip?? please pm me back whit answer
Hi, how do i find my no-ip? pm me whit a asnwer please i need more posts to pm

Krysis - December 8, 2012, 1:39 am

Guys help me, i don't know what "YOUR NO-IP HERE" is, i have registred on no-ip but should i set in the host i got from no-ip?
Or what?
Thanks on advanced.

BoomShot - December 8, 2012, 1:48 am

(Dec 8, 2012 02:39 AM)KevinVinther Wrote: [\[CITE\]](#) Guys help me, i don't know what "YOUR NO-IP HERE" is, i have registred on no-ip but should i set in the host i got from no-ip?

Thanks on advanced.
... you probably shouldn't be RATing if you cannot figure this out.

Example of "your no-ip here": youranidiot.no-ip.org

BigDickBandit - December 8, 2012, 3:36 am

Thanks for the tut Bro <3

Really Helpful. :)

kotopoulo - December 8, 2012, 12:11 pm

can i have the download please thanks in advance !

Exiled™ - December 8, 2012, 12:35 pm

Very clean tut and easy to read. Nicely done ?

NoAccess12345 - December 27, 2012, 6:21 am

a simple question, can it make a virus, I mean does it have a builder, stub and all. I have been away from all this since a year now , and unfortunately my best site went down and now i see a "legacy" living by, whats the difference between this and the 1 before.

tendeir0 - December 28, 2012, 11:46 am

i think no-ip has a problem, while i was trying to create a host i could choose domain, so i couldn't create a host...
HELP ME!

Op-Jax - December 29, 2012, 12:52 am

Thanks for everyone who replied i really appreciate it guys! Hope you like it xD for anyone who needs anything Hmu sorry i was away for like 3 weeks xD Am back now so Just send me a pm and i will happily help!

restl3ss78 - December 29, 2012, 4:35 am

thanks for this tutorial.It looks very nice

phoenix1450 - December 29, 2012, 4:39 am

nice post bro :D this was so helpfull for me >:)
oh and one other thing is there any working skype IP resolver?

chicagoron - January 1, 2013, 10:48 am

Ok I'm sort of new at this but i downloaded the latest 5.4.1 from the official site and it doesn't have anything to create a server? after some reading I figured out its just for monitoring. So how do I build a server/rat file? I also found another older version 5.3.1 and installed it and it let me build a server but when i go to test it on myself by clicking on it and trying it with sandboxie I get the follow error " could not be invoke program, system error, access is denied (5) " . Please help me out here. I have no problems making a donation to you.<http://cdn2.hackforums.net/images/smilies/blink.gif>

metorrite - January 14, 2013, 7:43 pm

thanks so much for the help! i got it to work on localhost. but how can i make it so that i can administrate another computer? that part confuses me, i remember my friend used a rat on me and i have no idea how he did it to me.

Op-Jax - March 6, 2013, 10:45 am

Glad everyone liked it :) this is kinda dead but oh well.

kill3ry0u - March 6, 2013, 10:54 am

Wondeful tutorial :)

Thanks for sharing it with us

(Jul 28, 2013 01:40 AM)3Dcore Wrote: [\[CITE\]](#) Hi every one, just wanna know how to send this to someone? thanks alotUse darkcomet 5.3.1 if you want to rat people , Gl :) ?

Anyurism69 - August 8, 2013, 6:44 pm

how do I download it/get the program?

kieranboy30 - August 9, 2013, 12:13 am

I have a problem if you would like to help me solve it?

The problem is that I have a Huawei EchoLife HG520b router and whenever I try to portforward and port no matter what numbers I use it still says invalid port number or, the ports can not be the same also there are 4 ports by the names Start port, End port, Start port (local) and End port (local)

Cyb3rV1ru5 - August 9, 2013, 9:05 am

Can anyone send me a non infected link

IFRESHI - August 21, 2013, 2:29 pm

Danggg This Looks Boss Bruh Haha Smexi.

TuTu - September 1, 2013, 1:23 pm

Thank you for this, really appreciated!

TeemuStew - September 6, 2013, 11:06 am

How can I spread it tho'? :/ All is working but how can I make the server

thrithinchand - September 6, 2013, 11:55 pm

cant download it when i click the link it shows the torrent was deleted

violacinZ - September 12, 2013, 3:17 pm

Thanks for the tut Bro <3

Really Helpful. :)

Op-Jax - September 14, 2013, 6:11 am

Glad you all like it , if you need to infect others , please use darkcomet 5.3.1!

sL1M - October 7, 2013, 5:26 pm

Could you help me setting it up, I have a verizon router and I can't figure out how to port forward it

Op-Jax - October 19, 2013, 2:43 am

Pm me if you need help , not online much cant pm everyone who posts , thank you. :)

vico100 - October 20, 2013, 3:06 am

thanks for the tutorial :) very helpfull

Topgun365 - November 14, 2013, 9:31 am

I need help with the port fowarding please

I need help with the port fowarding please

Balcha - December 19, 2013, 9:05 am

Hi! First of all, THANK YOU i've been searching a tuto for DC v5.4 since a long time.. but i've got a problem to port forward and as i'm a beginner I can't PM you.. Do you know a solution ? Peace

Hi! First of all, THANK YOU i've been searching a tuto for DC v5.4 since a long time.. but i've got a problem to port forward and as i'm a beginner I can't PM you.. Do you know a solution ? Peace

ProblemSolva - December 20, 2013, 8:28 am

where can i get the other darkcomet ?

this one is only if u have their permission to their computer.

stizza - January 9, 2014, 10:23 am

hi, if you still could help with the portforwarding that would be great, i can't pm you but is there any way you could help me port forward? i am on virgin media internet. thanks!

Op-Jax - January 10, 2014, 7:14 am

(Jan 9, 2014 11:23 AM)stizza Wrote: [\[CITE\]](#) hi, if you still could help with the portforwarding that would be great, i can't pm you but is there any way you could help me port forward? i am on virgin media internet. thanks!

Google how to port forward on your router Model Id.

If you need help Via teamviewer feel free to hmu. ?

hai1000 - January 10, 2014, 9:33 am

thansk for this

i will try this :)

Op-Jax - January 11, 2014, 6:08 am

You're welcomee =))

Enjoy.

?

Chief Keef™ - January 12, 2014, 10:09 am

I really appreciate this tutorial! :) Thanks bro. ;p ?

dean.lewis30 - January 15, 2014, 7:20 pm

Could you help me with darkcomet 5.3? I know how to set it up, I just can't seem to open it.. Skype: dean.lewis30

BitHeist - January 15, 2014, 7:31 pm

Thanks for the tut Bro <3

Really Helpful. :)

M?e?dal - January 24, 2014, 10:26 am

can u help me via team viewer it would be great

Op-Jax - January 31, 2014, 4:10 am

If you need help feel free to PM me.

espada04 - February 3, 2014, 2:20 am

why i dont have any connection.I already follow step by step ur tutorial

jojoloan - February 13, 2014, 2:43 pm

Thanks for the help :D Very nice tut

ibenslay - February 14, 2014, 9:14 am

Yup my port is open in canyouseeme. typed in everything word for word but nothing :(someone pm me please

Fajerfoks - February 23, 2014, 3:16 am

Awesome tutorial! Thanks a lot for this tutorial man.

mbigdav - March 10, 2014, 3:05 pm

hi very good info similar to team viewer but your info very good as knowledge is power and power is control thanks for sharing you wisdom to help us newbies ?

cudaica - March 10, 2014, 3:15 pm

If you guys need help setting it up w/ portwarding, PM me. I'll try my best (:

ryanh2633 - March 10, 2014, 6:35 pm

Very helpful Tut. Helped me personally. Thanks!

God of Tits - July 3, 2014, 6:19 pm

WWOOOW it worked. Thanks for sharing. You are such an intelligent person.

Foundatons - July 3, 2014, 7:01 pm

hmm i must try this at my college might be fun :P

Kyrro - July 11, 2014, 5:48 am

Link is dead... please reupload. Thanks!

F16™ - July 11, 2014, 6:26 am

turret file is deleted.

?????? :-(:-(:-(:

WinfieldBlue - July 11, 2014, 7:57 am

I used to use NO-IP and my 4 year account was banned due to terms of violation? Is No-IP option still available?

Austerity - July 12, 2014, 5:57 am

Thanks for sharing this, I might try this out soon it seems interesting.

NyxCoder - July 23, 2014, 11:59 pm

thank you this is really helpful! great job

shexxhacker - July 24, 2014, 3:13 am

Download deleted ...

Can you re-upload it please ?

Oliver Sykes - July 24, 2014, 3:35 am

This is so old.... I mean, since the OP was posted, this guy made over 1k posts and got ub3r...

OnlyOneNut - July 26, 2014, 3:11 pm

Not a bad tutorial!

Thanks for sharing this!
Not a bad tutorial!

Thanks for sharing this!

\$PMS\$ - July 28, 2014, 7:53 am

Download link is Dead

plz help...

deepaksai - July 31, 2014, 2:52 am

The torrent is deleted ?.Please post a working link which is not Backdored!!!

Oliver Sykes - August 4, 2014, 1:55 am

Guys, I'm guessing you didn't even read the op. If you wanted it that bad, just use team viewer. This isn't like DC 5.3.1, where they have no knowledge it's installed, and they don't have to confirm, this is the same thing as team viewer. Just easier.

EDIT: Just reread the OP, I guess it could be used maliciously, but it'd be much easier for you to use 5.3.1 guys. Business has a clean link, and I've made a tut for it.

SHaaKSooN - August 4, 2014, 3:38 am

Matt'

Hello how are you? i am new member of this forum can't pm you please tell me your skype or add me skype:shavi_777

i will pay need best Rat

Please see my post <https://hackforums.net/showthread.php?tid=4376681>

DoktorOptika - August 4, 2014, 6:37 am

What is the difference between 5.3 and Legacy? I'm using 5.3 and It works fine.

Oliver Sykes - August 4, 2014, 8:03 am

5.3 holds multiple clients, is usually ran without the person/people's knowledge, and is used maliciously 9.5/10 times.

Legacy is basically team viewer, just a lot more unsecure. If you added startup and persistence to legacy, they can keep controlling it. To my knowledge, though I haven't personally used it.

moderatehackor - October 18, 2014, 2:35 pm

(Sep 29, 2012 04:11 AM)Matt Wrote: [\[CITE\]](#) Notice THIS IS NOT SAME AS 5.3.1 THIS REQUIRES THEM TO RUN THE FILE AND GIVE U THERE IP AND STUFF , ITS LIKE TEAMVIEWER BUT BETTER!

Hello everyone... so today darkcoder officially released darkcomet legacy beta! i will show u how to setup it up :D

Obviously its like darkcomet but ... the difference is this isnt a rat the slave must accept and have that window open so u can control it.. u can use that at your home.. not to infect people! OK so lets start :)

1-Ok so first of all download it from official link posted by darkcoder:

<https://kat.ph/darkcomet-rat-legacy-beta-1-t6696057.html>

2-So.... once u download.. Open control module on the pc you want to control ... you should see something like this :

3-Ok so now first of all you need a no-ip... dont have one? You should find a tutorial on how to do it in this section :) ok type your no-ip in the ip/dns slot :D

3-Now you need to forward a port.. cant do that?! pm me.. .once you do type that port in the port slot :)

4-Now after you do that.. its time to type a password! the password will be used to make sure no1 can control ur slaves/computers other than you... try to make it hard.. and remember it because you will type in darkcomet_b!

5- now just use the display id to know wich computer is that and tick "active offline keylogger"

6- now click activate and open darkcomet_b from the same folder :)!

Picture:

7- ok now go to socket/net and add the port u used!

8- now after that click on the darkcomet text on the left corner and choose client settings!

9-ok now in general settings you will see something called "traffic encryption merged key (password)" there you type your password you used before!

10-now close that window to see your connection!

Video:it will zoom in in about 5 secs dont worry xD watch in fullscreen and 1080p for highest quility:[Video: http://www.youtube.com/watch?v=oDH_NExuyBw]

Credits for this program to : DarkcoderSc

I am not responsible for how you use this! thanks, please comment to keep this active! ?

It's funny that you mentioned TeamViewer in your OP. This is exactly the type of alternative for the program I have been looking for. At work I have been using the teamviewer free version but it blocks you after a certain number of times you use it. IDK how long you have to use it, but it's a huge problem for us because we have to monitor computers that are off-site and not connected to the network.

I remember reading that the creators of DarkComet made the program for exactly this and my purposes and never had any intention of doing serious hacking with it. Honestly, they should have done this from the beginning. Has anyone used this in a corporate setting as a TV alternative?

(Aug 4, 2014 08:03 AM)Oliver Sykes Wrote: [\[CITE\]](#) 5.3 holds multiple clients, is usually ran without the person/people's knowledge, and is used maliciously 9.5/10 times.

legacy, they can keep controlling it. To my knowledge, though I haven't personally used it.

Have you used this in a corporate like setting for TV alternative? I'm asking because I would like to test it out at work, but don't want to run into TV time limit problems down the road. We've used TV soo much at the office that they constantly block us and we have to get around them using servers. Those are quickly being blocked as well.

Oliver Sykes - October 18, 2014, 4:18 pm

Well, I'd recommend NanoCore or Imminent Monitor, as they're well-established Remote Administration tools.

RWX RAT And Nanocore are known for stability, while Imminent is known to be the fastest on HF. I'd look into those for a TeamViewer alternative.

moderatehackor - October 18, 2014, 8:51 pm

(Oct 18, 2014 04:18 PM)Oliver Sykes Wrote: [\[CITE\]](#) Well, I'd recommend NanoCore or Imminent Monitor, as they're well-established Remote Administration tools.

Well I don't want to pay for a work testing thing and I don't want to have to set up a Net Seal account just for work stuff. My team wouldn't be comfortable with that because I am not the IT manager. I don't have the final say. I can just make suggestions and see if everyone is comfortable using some alternatives. My boss is not going to be comfortable with all the Net Seal stuff that one has to go through when setting up the other programs you mentioned. I've used them personally obviously. Now, if I was the IT Manager...

FraizeR007 - October 18, 2014, 9:03 pm

LINK IS BROKEN. Please re-upload and fix! thanks!

Oliver Sykes - October 18, 2014, 9:08 pm

Fraize, this thread is OLD AS HELL. It's been gravedug. Of course the link isn't gonna work.

Tsubasa - November 15, 2014, 11:14 am

thank you for the great and interesting tutorial!

piecupolonia - November 15, 2014, 12:30 pm

reupload please , torrent deleted. i really think it will be fine

cmind - December 21, 2014, 3:55 pm

thank you really very much i found the tutorial very helpfull and detailed i really think i will use it :D

mrzello - December 23, 2014, 10:39 am

Thx ! Might be useful to set up this so good RAT

iTeeqey - January 12, 2015, 9:15 am

The torrent has been deleted :/ Got any other links?

Fajerfox - January 19, 2015, 9:50 am

Thanks for this tutorial/guide man! I really need this!

classy101 - February 6, 2015, 10:27 pm

download doesnt work? plz help guys (:

afexmillion - February 8, 2015, 7:54 am

An update on this tutorial would be helpful. Thanks

Oliver Sykes - February 8, 2015, 7:55 am

Can you people STOP posting? This thread was made in 2012

The Download was removed you msg me a diff link

elyssapsg - May 8, 2015, 11:21 am

yes thx darkcodersc is the best french coder thx for tuto

QuesinTTT - May 16, 2015, 4:19 pm

Can someone find a new clean link?

wastefellow - May 17, 2015, 1:36 am

its too late i know

do anyone have to proper download link of this RAT and a good crypter ?

spradebassen - May 17, 2015, 1:38 am

(May 17, 2015 01:36 AM)wastefellow Wrote: [\[CITE\]](#) its too late i know

do anyone have to proper download link of this RAT and a good crypter ?

The RAT can be found on several places in the section. You can find free crypters, but if you want a stub which is crypt most of the time you should consider buying one.

The_101 - June 7, 2015, 12:47 pm

Brother How To Do For Victims Please Help Or Is It for just traffic password

sonictype - December 8, 2016, 4:45 am

download link it's dead :)
