Thread: [\[HOT\]\[Tutorial\]Darkcomet Legacy 5.4.1 setup + download\[Tutorial\]\[Video Included!\]](#)

Op-Jax - September 29, 2012, 6:19 am

Hello everyone... so today darkcoder officially released darkcomet legacy beta! i will show u how to setup it up :D

Obviously its like darkcomet but ... the diffrence is this isnt a rat the slave must accept and have that window open so u can control it.. u can use that at your home.. not to infect people! OK so lets start :)

Difference between teamviewer and darkcomet :

<https://hackforums.net/showthread.php?tid=2901988>

1-Ok so first of all download it from official link posted by darkcoder:

<http://www.sendspace.com/file/ivuojs>

2-So.... once u download.. Open control module on the pc you want to control ... you should see something like this :

3-Ok so now first of all you need a no-ip... dont have one? You should find a tutorial on how to do it in this section :) ok type your no-ip in the ip/dns slot :D

3-Now you need to forward a port.. cant do that?! pm me.. .once you do type that port in the port slot :)

4-Now after you do that.. its time to type a password! the password will be used to make sure no1 can control ur slaves/computers other than you... try to make it hard.. and remember it because you will type in darkcomet_b!

5- now just use the display id to know wich computer is that and tick "active offline keylogger"

6- now click activate and open darkcomet_b from the same folder :)!
Picture:

7- ok now go to socket/net and add the port u used!

8- now after that click on the darkcomet text on the left corner and choose client settings!

9-ok now in general settings you will see something called "traffic encryption merged key (password)" there you type your password you used before!

10-now close that window to see your connection!

Video:it will zoom in in about 5 secs dont worry xD watch in fullscreen + 720p/1080p for hq even when zoomed out! :[Video: http://www.youtube.com/watch?v=oDH_NExuyBw]

Credits for this program to : DarkcoderSc

I am not responsible for how you use this! thanks, please comment to keep this active! ?

tejasnmchavan - September 29, 2012, 7:55 am

I knew how to set up, But thank you very much for the tutorial on Legacy... :) Interface looks changed a bit...!

Sadly, we cannot use it as a trojan or without people coming to know about it from now on... Maybe somehow hackers will find a way out of it...!!

SUPER CHAMP - September 29, 2012, 7:56 am

Umm nice tut.

TBH its of no use to me, argh no slaves no fun.to keep it simple. :-|

7ewis - September 29, 2012, 8:06 am

What do you mean? The purpose of this is to be like Teamviewer or something, NOT a trojan..

If you want to use one for that purpose, why don't you get the original version?

tejasnmchavan - September 29, 2012, 8:22 am

(Sep 29, 2012 08:06 AM)7ewis Wrote: [\[CITE\]](#) What do you mean? The purpose of this is to be like Teamviewer or something, NOT a trojan..

If you want to use one for that purpose, why don't you get the original version?

Thanks 7ewis... I know that, Sad Because cannot prank friends now on and old version won't be FUD some time later...

and I believe DarkCoderSc has done a good job using his black-hat-tech to make good legit programs...

Op-Jax - September 29, 2012, 8:22 am

O.o thanks for the feedback guys! took me forever to do this xD thanks :D

SmexyApple - September 29, 2012, 8:33 am

Thanks for this awsoe tut.

i thought DarkComet is closed project isnt it?

7ewis - September 29, 2012, 8:38 am

Well use the latest version he released, then crypt it.

I have a copy of it, if you don't have it.

Yeah ageed! :)

i thought DarkComet is closed project isnt it?the rat it self is no longer getting updated but u can download it.. this 1 is a legit version of the rat.. its like teamviewer.. but better :)

DukeRed - September 29, 2012, 9:30 am

Well happy news for DarkcoderSc fan they are back with a legit Rat.
Thanks for the info man.

Op-Jax - September 29, 2012, 9:33 am

i am glad you liked it will update when i get more info!

Chaoskitten - October 1, 2012, 7:48 am

ah i wish for a vid tut on the newest vrs of dc

tux1 - October 1, 2012, 9:56 am

Nice tutorial but the video was a bit hard to read.

Has the new DC got any new features?

Op-Jax - October 1, 2012, 1:34 pm

(Oct 1, 2012 09:56 AM)tux1 Wrote: [\[CITE\]](#) Nice tutorial but the video was a bit hard to read.

Has the new DC got any new features?same as old 1 but legit version. about the vid.. just watch on utbe in full scren with 480p.. will be so ez to read!

Misfits - October 1, 2012, 4:56 pm

Never heard of it but it sounds good :D, not trying to bash your thread or anything but how do i know its safe? :p

Op-Jax - October 1, 2012, 8:41 pm

i posted the same link posted on darkcodersc page search his page on facebook...u will find its the same link! thanks :)

Craig1690 - October 2, 2012, 6:11 am

OMG thank you i can finally setup dark comet!

Op-Jax - October 2, 2012, 7:15 am

your very welcome! am happy i was able to help u!

komatic - October 2, 2012, 8:17 am

Oh .. I was so glad when I visited Darkcoder's website and saw a brand new version of DC... It doesn't work the same way as the previous versions but it'll easily replace a VNC server. nice !

SIM-1293467 - October 2, 2012, 11:49 am

thanks for the topic but i think make the auriginal link is better.

alisina33 - October 2, 2012, 12:54 pm

it suck go find on the forum for darkcoment AT531 it easy to make a rat and beter thane thise crap i us it but it sucks

Bendog - October 2, 2012, 3:24 pm

I cannot figure out how to use this, I need to know how gain undetected desktop access to a person on the IP I have, anybody know how to do this?

rockwilly - October 8, 2012, 1:15 pm

Thanks for the info on legacy, I have been searching everywhere for a download to a earlier version of DarkComet.

SIM-1472198 - October 9, 2012, 5:22 am

Thank you very much for this tutorial. btw, how do i spread it ? :) thanks!

samrokzz - October 9, 2012, 6:45 am

Very nice tutorial .

Thanks for the share .

Op-Jax - October 9, 2012, 11:53 am

Thanksss!!! if u need any help please feel free to pm me!

cr4cker - October 10, 2012, 8:06 am

please tutorial create stub server

thank you

MUT4NT - October 10, 2012, 11:11 am

(Oct 10, 2012 08:06 AM)cr4cker Wrote: [\[CITE\]](#) please tutorial create stub server

thank you

I thinks it's not possible, the author had legal problems, so wait for news

IlMafiall - November 30, 2012, 9:17 am

Thanks alot dude. Especially the video!

yoloyang - January 12, 2013, 11:02 am

how do u spread this to other computers? please respond asap

basble - January 12, 2013, 3:47 pm

Very nice tutorial.

Thanks for the release

The Sailor ? - January 12, 2013, 3:57 pm

DarkcoderSc is the fucking best programmer coder ever!

:) Thumbs up

rainbowcarebear - January 13, 2013, 12:37 am

How do I connect to other peoples computers?

I'm trying to test it on my friend but when I enter his IP it never connects me to him

Any suggestions?

Any suggestions?I think you need darkcomet 5.3.1 also check utube they got plenty of tutorials.
really sorry for late reply

elleined - May 29, 2013, 3:35 am

Hello sir can you teach me how to port forward so i could start using this program?I would really

appreciate it if you would. Thanks :P

Am out atm using my phone but once am home sure :P

elleined - May 29, 2013, 3:45 am

Thanks Pikachu :P ill be waiting for you to get home..Take care :)

JollyBean - May 29, 2013, 5:11 am

I personally prefer Cybergate,
but this seems to be great too!

Thanks 4 sharing

Op-Jax - June 3, 2013, 4:55 am

Your welcome , And sorry elleined i totally forgot , please pm me :)

Werto - June 3, 2013, 5:14 am

Well, the download link is broken :L

Mind posting a new one? If you've got one tho :P
