Thread: [\[Tut included\]Difference between teamviewer and new darkcomet legacy!\[Lots of info\]](#)

Op-Jax - September 29, 2012, 8:57 am

Ok so we all know yesterday darkcomet legacy got released... and i can confirm its same as darkcomet.. but legit one :) so i made a thread on how to set it up.. and most replies i get are like "Why use this other than teamviewer" well... we all know teamviewer is great and really fast.. but.. if you want to control like much computers .. in a legit way... i doubt you will use teamviewer... so lets compare them !

1-Teamviewer

ok so lets start with teamviewer... teamviewer is well known as one of the best remote desktop tool :) why is that?! well.. teamviewer is really fast , u can switch sides.. , really fast when you control someones pc.. and so on.. but there are some bad things... one of them is u cant use this as a rat.. never.. u can only use this if you want to control 2 pcs max! other than that... it will be kinda hard... still not convinced why you should use darkcomet legacy?! ok.. lets check its features!

2-Darkcomet legacy

ok now lets see darkcomet legacy! well darkcomet legacy is really easy to setup not hard at all... can be used as a rat.. it has a password stealer a keylogger and more...! can handle more than 100 connections! but.. nothing is 100% good.. darkcomet is kinda bad at remote desktop.. sometimes its slow .. and takes time to send command.. but other than that its the best in my opinion... to set it up check my tut : <https://hackforums.net/showthread.php?tid=2901632>

Ok .. so.. its your choice now! choose whatever u want.. for me.. if helping some1 i will go with teamviewer.. controlling much pcs (legally) i will go for darkcomet! thanks for reading :D hope you enjoyed.. took me much to type this.. would be nice of you if you reply!??

DukeRed - September 29, 2012, 9:28 am

Ok so DarkcoderSc are back with a legit rat.
Sounds cool!!
Thanks for the info and compare.

SmexyApple - September 29, 2012, 9:30 am

Thanks for the info , i dont know how you can compare TV to a rat but..
i like :)

Op-Jax - September 29, 2012, 9:32 am

well its no a rat really its like teamviewer but better! thanks for the reply guys!

Is there a official site to get this tool?
I mean is it launched publicly?

yes its on darkcoders page.. and i posted the official link on my tut its a torrent by darkcoder! thanks :D ?

Manwë - September 29, 2012, 11:20 am

FYI, TeamViewer is also a RAT - the difference is that it isn't silent.
