BTW this just for the ruled victims as the PIC shows ? still have many unread e-mails ?

eXero - February 27, 2010, 5:57 am

do you have any runescape accounts?

Sò.óT - February 27, 2010, 6:02 am

It's great keylogger cause for email it actually creates a folder for each of the victim and upload logs in them where no keylogger actually does this.

Congrats, but I prefer stealers imo. Less chance of it being traced back to you and you get exactly what you need. Keylogging is something I would use for private reason and snooping.

Nice work, I don't spread keyloggers at random victims that much. Mostly I have a target...
