Looks awesome! I've been compiling a bunch of different tool kits and packs like this and would love to get a link to yours and see what I might've missed. Thanks!

I've been compiling as many scripts/tools/bots/books as I am able to get my hands on, I would really appreciate a Link to see what I might've missed in yours. Eventually I'll compile into one big pack (+5 GB) ? Thanks!

OPs account is dead/closed thus you cannot receive it even if you send him PM. Its 2012 thread, so unless someone have backup and willing to share it with you (or others), you cannot receive it. Sorry!

So I have been having trouble lately getting clients on my njrat 0.7, I know nj sucks but im using it for testing as of now. So I get no installs, is there a way I can install the the crypted stub if someone has a port open on their ip, could I use telnet on that open port and upload the stub? I know it sounds stupid, but is there a wa to RAT someone without them even running it?

I need link please

thank you man

hope to be usefull

Hack packs are typically outdated tools. Waste of time to download with slow internet unless someone can vouch that the tools work.
