Thread: [Ban Reason \[On Profile or Linked on Profile \]](#)

Baked - September 29, 2012, 11:35 am

I just thought of something that would be pretty easy, it'd have to be an Ub3r only feature (As checking bans.php is anyways)

But, on a banned members profile, it should echo out the ban reason and length for Ub3rs only.

Or (this would be more complicated) but when you click a Banned username on Profile, it will go <https://hackforums.net/bans.php?find=USERNAME>

Where it would bring you right to the usernames line in Bans.php

I know it's not necessarily needed but I don't think I'm alone when I say it's a pissoff to search through bans.php to check someones ban.

Nate - September 29, 2012, 11:36 am

This is a nice suggestion and agree with it.

Zoidberg - September 29, 2012, 11:38 am

This sounds like a great idea. I hate having to go to bans.php just to check why someone specific was banned.

Nyonic - September 29, 2012, 11:38 am

This would be a good idea, hope it gets added.

_DeNy - September 29, 2012, 12:38 pm

Just gave me a good idea for a script... Too bad I can't release it. xD

Mohatu - September 29, 2012, 12:48 pm

Sounds like a good idea to me. I'd like to see this added.

BaussHacker - September 29, 2012, 12:55 pm

Damn you come up with a lot of good suggestions :p

BLKLXVESMATTER! - September 29, 2012, 1:04 pm

Nice idea, it's a shame that I wouldn't be able to use it even if it was implemented.

Good luck with this! ?

TechApp - September 29, 2012, 1:05 pm

It sounds like a good idea to do. Seems pretty easy too. I think it would need to be an UB3R or L33T feature only though.

Lady Deathstroke - September 29, 2012, 1:06 pm

I agree with this but at the same time I cannot see it being added as omni will just say you can simply do ctrl + f and type a username to find but eh we'll see how well this goes down.

Disparity - September 29, 2012, 1:07 pm

Sounds like a good idea to me, i agree with this, id want to know how long and for what reasons

someone was banned.

Osuka - September 29, 2012, 1:07 pm

I also agree with this idea, and idk if its me but i hate it when im late to check on someone on why they were banned and its not on the list anymore. =/

Viral Dragon - September 29, 2012, 1:34 pm

o.o Well, echo'ing it out on the profile wouldn't be that hard actually...

I just don't see the use? You could just as easily go to bans.php and ctrl + f the name?

I'm kinda split between this decision. I want to say yes and no.

-Viral.

'Cody - September 29, 2012, 1:35 pm

Just ctrl F the name it's honestly not that hard.

(Sep 29, 2012 01:35 PM)Cody? Wrote: [\[CITE\]](#) Just ctrl F the name it's honestly not that hard.

Sure it isn't hard, but it wasn't hard to use advanced search for deal disputes, but the DB was still added.

It wasn't hard to just click UserCP, and click Name to see profile, but name in header was still hyperlinked.

This suggestion is for ease of use, not a new feature.

Omniscient - September 29, 2012, 2:16 pm

Would require a query. No thanks.
