snyper_x3 - October 1, 2012, 5:55 am

it was easy xD

lino08 - October 1, 2012, 9:21 am

lol i thought that if you get "The used SELECT statements have a different number of columns" you could only do double query so is there a way to use union based sqli even in those cases?

I managed to do it only with double query, sry...

I don't know what link did you use but regular union select works without problems. I didn't get any "The used SELECT statements have a different number of columns" error.
