Thread: [\[XSS\] Vulnerable partner network \[XSS\]](#)

JOrd - October 1, 2012, 5:59 am

I showed these guys they had a XSS vulnrabilty and they just talked shit and said it was nothing and there going to ddos me LOL. Anyway here is the site: <http://renovanetwork.com> Do what you want =) (Found in search box <http://renovanetwork.com/about-us/>)

Spoiler ([Click to View](#))

Well, put a keylogger in there or one of those cookie things? Hack dat website! :D

JOrd - October 1, 2012, 2:40 pm

Yer, i might deface it myself later this week :)

Setup a cookie logger, hope for the best :D

Amph - October 2, 2012, 6:56 am

How did you get the SQL XSS etc bar below the url bar ? Anyways, fuck with them :)

SUPER CHAMP - October 2, 2012, 7:03 am

thats hackbar mate..a firefox addon.

dude just deface there page.

How can you set up a cookie logger that the admin will see if it's not persistent? ?

~Arcane ?
