I'm a big Lil Wayne fan so here you go!

And..

Sorry but those are both horrible. 3/10

It is pretty nice what did you use photoshop or indesign?

SIM-1327690 - October 2, 2012, 2:49 am

Absolutely horrific, -4/10.

Reason: it was 1/10, but you were granted a -5 due to Lil wayne.

are you a beginner in photoshop or w/e? keep trying :)

Sorry, but these really aren't that good. It looks like you google image searched pictures of lil wayne, copy/pasted them, then put text over them. The text looks like a generic font, and doesn't even match the background. Honestly, I doubt this even deserves a 2/10, but I'll give it that because at least it isn't an msPaint stick figure...

I don't like it. To be honest it looks like you just downloaded a picture and put your name on it.

Horrendous looking signature. Look at some tutorials for your own sake.

Budz N Nugz - October 2, 2012, 12:21 pm

What did you do other than Google "Lil Wayne Mirror on the Wall" and write all over it.

I have to agree with above, your in the negatives just for even choosing Lil Wayne.

Damn, the folks here are so blunt. D:

Try looking up some blending tuts.

If you're starting out, don't use stocks.
