Skype Resolver!

First of all what is a Skype Resolver?

It is a program where you enter someone there SkypeName and you get there IP!

The past time I see alot of people looking for Skype Resolver and people posting them.
Most of the time the Skype Resolvers got viruses or doesnt work...

So I am posting this:

An online Skype Resolver from Anonymous.

No download.

100% working.

Free!

No problem! Hopes it helps you all.

What do it with an IP?

You can search the person up or if you dont like them boot the IP ;\$.

There are alot of thinks you can do with someone IP thats why Skype Resolvers are so popular!

This website is offline

BTW this is just to annoy a friend right? His internet won't work right?

Update: It is up and running. Working fine...

BTW I am curious to know what all can I do with someone's IP except DDOS?
