Hello, HF!

I was scrolling through different threads, when i thought: "Why not make a service of my own?"..and so i did.

This service is perfect for those who have websites, or need work done.

Objective:

The objective of this service is to write articles for members who need it. Topic doesnt really matter to me, so long as you are satisfied with it.

Prices:

I have to be reasonable on this one. Nobody wants a rip off. So, here are my prices:

SMALL article (2-3 paragraphs): \$2

MEDIUM article (3-5 paragraphs): \$4

LARGE article [not sure if you're gonna need one though] (Max of 7 paragraphs): \$6

Articles do include pictures; if you want them. Price? FREE.

Good enough for you?

How it works:

Tell me the details of what you want the article to be; formatting, pictures, etc.

A made template is below:

Topic:

Formatting (Font? Size of text? Color?):

Pictures (Yes/No):

Why do you need this article? (OPTIONAL*):

I will then make an article on what you requested. The time you'll have to wait is 3 days MAX. It is depending on what your topic is, etc.

Once finished, I will send you a preview of the article: this includes the title and a paragraph of the article.

If you like it, then all you have to do is pay and ill send the article to you. If not, then I will be willing to adjust it to your need.

Also, if you buy this service, please do leave feedback. (:

Instead of paragraphs can you tell us, how many words will be in the article? Do you have any specific niche or you can write about anything?

Anything, really. I'm not sure about words though. Ill get back to you on that.
