It says on your sig google first page? Does that mean you guarantee that?

Also your only screen shot is for a long tail keyword the is really long. The keyword "hacking tips and money tips" doesnt even show traffic in google adwords and has a zero cpc and competition. 4real?

Do you have stats for more popular terms or higher traffic keywords.

Dear Sir,

I know your question is reasonable. But i can't post my clients sites and keyword publicly because they don't want that we use their site for our Seo promotion.

But the admin of tips-forum told me to do so. So, i posted their site. they used these keywords. I just rank it up.

They seem to be having problems with their paypal account "This recipient is currently unable to receive money." Might be due to others opening reports against them. I will have to open a refund request in a day since there's been no movement in my rankings and it's past the 30 days the listed in the invoice.

RandomGuy™ - March 5, 2013, 1:08 pm

The problem with SEO is that you can never ever guarantee rankings.

There are so many factors that you have to consider when ranking for different keywords. If you choose a very competitive keyword you will never ever get in the top 10 with services like this. Companies spend millions to stay on the first page of google.

Nathan1244 - March 22, 2013, 11:44 am

Big Easy - April 28, 2014, 9:20 am

I have read your thread and the "proof of seo" screenshot you are showing off isn't really appealing to me.

Keyword phrase "hacking tips and money tips" has literally almost no competition targeting that specific phrase on google and the average monthly search rate is so low, adwords doesn't even list it. Hell, I'm pretty sure the site would rank for it naturally without even trying.

Screenshots: <https://i.imgur.com/5lwfOF7.png> and <https://i.imgur.com/4gwV6bR.png>

I wanted to purchase your services for my websites but I have changed my mind, sorry buddy. If you are able to show me better proof of your services and SEO knowledge, please hit me up and I may consider paying you.

Dito. Advertising with a keyword like "hacking tips and money tips" is a bit ridiculous, especially when not even ranking in 1st spot. The average monthly searches and competition for that specific keyword aren't even shown in Google Keyword Planner - if possible you should bring up a proof with a more popular keywords. Just my two cents.

Are your High PR profiles actual high PR links or just root domain with High PR?

vouch.

Im now on page 1 of google :D

Thanks again !

Balloon - June 10, 2014, 12:05 am

You could also have a link to an SEOClerks page for people to pay through. They accept Paypal, BTC, ETC..

It would benefit you in the future as well as you will pull sales.

Aussie - June 10, 2014, 2:52 am

Posting here as I may in the future buy this for a new forum I plan on needing promoting to.

This is all well and good with your samples, but Google search results mean nothing in terms of difficulty in ranking keywords. Can you rank medium keywords?

'Tits McGee - July 3, 2014, 7:43 am

User is easy to deal with. Sadly my website got taken down during the process of the SEO but he

offered me a refund due to this issue:)

Still not sure whether or not he is just away currently. I checked on a few sites he sells on and they all say the same thing. July 15th was the last time he logged in. People that claim to be scammed haven't stated how long they waited for SEO because you generally start seeing results after two-three weeks.
