How do I write a pre-written Pm link for like my signature? Thanks!

Sorry if it says how and I just missed it...

I would also like to know how to do this.

Thanks!

Here is the link, you can edit according to your convenience. I believe there was a MyCode for this too.

Code <https://hackforums.net/private.php?action=send&uid=XX&subject=Subject&message= Enter Message here>.

You can also use this [MyCode](#) for same purpose.

Code [pmme=SUBJECT EXAMPLE]Please PM me from this link. Link Text can be anything.[/pmme]
