A bit pricey. Just a suggestion, I'd add 100 bots. 100 bots is only \$3 as well soo. :/

#Sultan - October 7, 2012, 6:14 am

\$70 is a bit pricy, i would buy if it was like \$50

????Chicago Bulls - October 7, 2012, 6:58 am

this is hella overpriced.

All of this can be free. i dont get it.

Vicious????? - October 7, 2012, 7:22 am

This is really not worth \$70. I'd do this for anyone free.

RAT = Free
JDB = Ub3r Section/Free
VPN = \$5/10\$
Crypt = 1\$

Seriously, why would you even try to get this amount of money from people, rofl

After consideration, we've decided to change the price to \$50. This, despite of the many comments contradicting it, is actually pretty cheap. Everything we include in this package is 100% FUD and of the best quality. Some people have no idea how to set it up or don't know which products to use. And regarding your prices; we are offering them a FUD, quality, privately coded JDB by FoxyJava (which ensures it to stay FUD for a really long time), not some UD free one. We also include an eBook worth \$15 and additional guidelines, as well as full support regarding the software.

?TONE - October 7, 2012, 8:03 am

Unlike the others think this is a very good service for beginners. Very nice price and beginners could learn alot from this. Good luck with sales.

7zS2 - October 7, 2012, 10:08 am

Ok thread design updated. Now \$50 and it contains a lot more details about the service and programs.

Open for sales :)

RECK - October 7, 2012, 11:17 am

Vouch very respectable users!

Would trust them with anything.

nitoh - October 7, 2012, 12:40 pm

Damn i did this for free for soo long why didn't i thought of this :p

GLWS op

xwtf - October 7, 2012, 12:42 pm

No offense, but any idiot could do this themselves, for a lot less.

7zS2 - October 8, 2012, 8:03 am

Present and ready to take sales. My associate is also online so we could set it up in the blink of an eye for you ;) ?

Fire Time - October 8, 2012, 10:49 am

im feeling this thread its got potential for sure.

Ropey - October 9, 2012, 4:33 am

Nothing ultimate and for \$50? Way too overpriced.

Sir Cyrano - October 12, 2012, 5:32 am

Much obliged mate :) ?

I'm present and open for service.

7zS2 - November 9, 2012, 2:39 pm

Still offering this service! Add me on Skype if interested.

Hacker-error - November 9, 2012, 2:48 pm

Hello,

A bit interested; depends of what're the 4 RAT. Can you say me what're the 4 RAT you can give us and set up for us ?

Thanks and Regards

Square™ - November 9, 2012, 3:01 pm

good work and goodluck with your sales :)

Deep Fried Eggroll - November 9, 2012, 3:10 pm

I agree with the rest. If you do not know how to set up a rat, then you should probably not have one. Learn to make one and use the money for bots or something else that is useful. If you buy this, you do not learn anything and you are 70 dollars short for something you could do by yourself for free.

Anyways, I guess this is a good service I guess for beginners. Good luck with sales.

7zS2 - January 2, 2013, 10:58 am

On Skype to answer any questions and present to aid you with this service.
Add me if interested: maxrunescape. ?

D4rkNet-X - February 8, 2013, 10:38 am

which 4 rats are used, could you answer this previously asked question please?
it might get interesting then if it's a private/fud rat

mikewhite06 - February 9, 2013, 3:08 pm

this is really over priced. you should reduce your price pls

#NoTrayIcon - February 13, 2013, 5:06 am

how much for the javadriveby and spreading techniques? I don't need the rest.

Chelsea Monday - February 26, 2013, 12:25 pm

I think this looks a great service.

GLWS - I will be in touch shortly with an order for you. If things go well, I'll have more work for you :)

Troj?n - March 21, 2013, 10:49 am

Massive massive vouch for my brother 7z,

I will be buying this package soon but he has already set me up multiple services in the past, Also he is an awesome friend and an experienced blackhat he knows his shit, Hes currently teaching me some stuff.

I would highly recommend this package to anyone who is buying :)

Have a great day!

Thanks for the vouches guys. :)

I'm ready to do business, so hit me up on Skype (Skype name: maxrunescape) or, if you must, send me a PM via HF! ?

Regards,

It's not. I paid them \$50 and they replied that they were having trouble with their Paypal account and couldn't help me. Repeated Skype calls and PMs have led nowhere.

I don't mind paying a few bucks to be able to ask a few questions, but this would have cost them nothing, and that nothing was too much for them to come through with.

I don't know if I'd call them scammers, just incredibly lax and indifferent and I would not expect them to come through with anything. They might for some folks, and if you are sure you are one of them, go for it. Just know you are tossing dice.
