Thread: [\[Source\] Blue Theme v2 - With glowing buttons and drop shadow](#)

BlackCap - October 9, 2012, 10:54 am

LastThread: <https://hackforums.net/showthread.php?tid=2924071>

Edits since last version:Made the form dropshadow sexier

Made the contol buttons glow sexier

Optimized the drawing process; the form now draws at about 1-3ms vs. 15-23ms at 660x340.
4-7ms at 1366x768.

Realised that it crashes at designtime. Fixed it

Made the text fontstyle regular instad of bold

Why thank you.

It's because I have an unusual hobby which most people seem to ignore, other than the ones who poke me on my back and asks if I could hack facebook for them whenever I code in public. So I release it open-source on the internet for others to learn from instead, as internet seem to lack documentation on most advanced stuff in .net, and hackforums seems to be the capital of peoples who needs my help.

Epic theme normally I hate using any theme because of many reasons but this is really good one.
This one is really deserved to be called a "theme".

CakePHP - October 9, 2012, 12:17 pm

Good job, again ! :)

unfortunately it does not really look like the real theme of windows 8.

But i like it ! :)

If you read my last thread you'll see that that was not my intention either, I made it for some guy out of his descriptions.

Thanks :)

ah ok, if you can create the really windows 8 thème, i really need this :)

simonbenyo - October 9, 2012, 12:54 pm

really nice theme thanks for releasing wont forget credits if used ;) good job thanks?

Khaos Theory - October 9, 2012, 1:16 pm

Seriously that is hot! I'm extremely jealous of your amazing gdi skills. Good job BlackCap!

Les Frères - October 9, 2012, 3:34 pm

This looks really great, almost identical to app windows in windows 8.

Good job

hazeleekaizera - October 10, 2012, 7:33 am

Hei Black Cap i love your art and design = D

eriger777 - October 10, 2012, 9:29 pm

Would be cool if you could make a theme like this

lololol. Funny. This theme looks really good and it's supah unique to the rest. I have a project I can think of right away for this. Outstanding.

Kazooo - October 10, 2012, 10:38 pm

Wow Thanks for this epic release keep it up man :)

xXxBrendanxXx - October 12, 2012, 7:52 pm

Why does this look like the darkcomet theme ? OP: Looks sexy

Snowflake™ - November 12, 2012, 9:40 pm

Damn in vb.net , it gives me like 40+ errors :(

That's wierd, funny how it works for everybody else right? :P

Can I have a screenshot of the errors?

Hiio - November 12, 2012, 10:09 pm

I love the blue glow, also this kind of reminds me of windows 8.

OneTXxL - November 13, 2012, 3:24 am

good jo very good contriution here thank
