Thread: [Member tried to infect another member !](#)

Don Dada - October 10, 2012, 7:03 am

Hai Society,

I know it's the wrong section, but I don't know where else to post this.

There is a member, also known for:

On skype for: €

Skype id: mikenelz2 ([Click to View](#))

He tried to infect me on skype with RAT (Blackshades says Virus Total)

Proof: ([Click to View](#))

Translator:

(www.google.nl/translate)

The file:

<http://www34.zippyshare.com/v/76010527/file.html>

Virus scan: ([Click to View](#))

<https://www.virustotal.com/file/7ed91bbc2bc7fb5968a7af05470bc98008f0c022a59cf8aa8bda92c9abeb2203/analysis/1349876370/>

How did he get it .jpg;

File spoofer, name it fotosjpg (in this case)

than spoof it with .exe and you'll get fotosexe.jpg'

On my destkop:

How I found his HF profile, I googled his skype name and found those threads:

<https://hackforums.net/archive/index.php/thread-2649284-2.html>

<https://hackforums.net/archive/index.php/thread-1592318-99.html>

And if you click on Tello you'll get his profile:

<https://hackforums.net/member.php?action=profile&uid=462999>

I think this is enough proof,

If not, then everyone beware of him.

Cheers.

Edit (more proof:): ([Click to View](#))

There is no on-site evidence so nothing will be done.
