Well sorry for posting it in the wrong forum. :(

autorunman22 - October 10, 2012, 12:01 pm

i think its pretty traditional to post free shells in this section cause it has something to do with ddosing, what can a botnet do.

and OP, OMG thanks for that list but almost all of them are from a single free domain and others have already params and value.

No, this section has nothing to do with ddosing. Not all bots support ddosing, hell. Any decent bot that's not "EPIC BOT / DDOS / BITCOIN MINING / RUN XBOX LIVE CODED IN VB.NET | .NET 4.0 DEPENDENCY" doesn't have a DDoS feature. Zbot, SpyXXX, Andromeda, Smoke Loader, do you see any of them having DDoS features? No. Also, shells have NOTHING to do with Botnets, IRC Bots, or Zombies.

PrivateDonut - October 10, 2012, 12:13 pm

I might be hosting 3 - 10 private shells on a VPS soon for Ub3r and l33t members. ;)

It's really Botnets, IRC Bots, and zombies. I didn't see anywhere else to post these and seen many threads listed under this giving away shells so I posted here.

UPDATE - I will be hosting private shells in the next 3 - 4 days for l33t and ub3r users only so if you want more info about that send me a private message!
