Thread: [Shell Booter Source V2 \[Direct Download\(MediaFire\)\]](#)

Pumpkins - October 11, 2012, 9:24 am

Previous Thread: <https://hackforums.net/showthread.php?tid=2381660>

I got bored and decided to work on an old project, feel free to download it and work on it, that is if you'd like to give me any constructive criticism. This is mainly for beginners to learn from to understand webrequests, loops and threading.

Change log:Webrequest sent differently now

The Webrequest is now threadedDoesn't freeze the form

Improved interfaceShows handled exceptions (IE: Failed requests)

Use of imagelistsTabs

Listview

Changed the tab look

Removal of the useless top bar

Changed the way the client pings

Things to note:Requires .NET framework 4.0Uses double panels

Form is fully resizable

No replies? Gosh, bunch of leechers :l

Jaxxy - October 16, 2012, 1:54 pm

Hey thanks man!

Ive been looking allover HF for something like this. Im thankful you added a mediafire link directly on the thread.

Thanks Zakary!

thanks dude good job thanks for sharing.

Dark_Noodles - October 18, 2012, 3:21 pm

This died pretty quickly. I don't know why you just won't make it post/pm. People are gonna start to just leech the download without saying thanks

_Phoenix - October 20, 2012, 8:22 pm

I would love to have this, please. Thanks.

Percocet - October 20, 2012, 8:28 pm

At least it's somewhat different from all the others I've seen. It uses the default UI, which is better than some of the shitty themes I've seen people use.

Frightening - October 20, 2012, 10:25 pm

Can I get this source? Need it bad. Thanks

SIM-111414 - October 20, 2012, 10:26 pm

PirateBoy - October 21, 2012, 2:52 am

This looks very nice, i will take a look.

Examine - October 21, 2012, 2:55 am

Can i grab this? Thanks in advance!

I like the whole idea of being able to "load" your own shells into the booter.

Makes it seem like it will work amazingly. Haha!

- Jaaedyn

Aubretia - October 21, 2012, 8:48 am

Can i have the download link? If its a survey, nvm. I can't do them in my country. :)

Looks good will check it out later ?

xRoThx - June 27, 2013, 12:35 am

Hi

Thanks for that source, That is exactly what i search for. I wanted to learn making it myself, But i needed an example. I downloaded it and start a remake of it & dont worry. Aslong as i base my booter on yours, you will keep your credits! Thank you so much for the public version. I know there will be a lot people deleting your credits and others not even saying thanks.

Thanks a lot for this!

Greatz

xRoThx

thanks for the sources buddy, going to read them

iMalware - December 7, 2013, 7:13 am

It does not work at all. I'm loading my shells it takes like an hour before it starts booting it does not even work

FrostFlex - September 8, 2016, 8:15 pm

EASY UFONET/BOTNET

IF YOU ARE A BEGINNER YOU MAY WANT TO TRY ./ufonet FOR KALI LINUX. You don't have to install the iso. Just go to kali Linux and download the VMware image. Then go download VMWare workstation.

1 step- download ufonet

2 step- extract ufonet from the folder inside the folder with the version to your desktop and delete the version folder

3 step-open terminal (NOT METASPLOIT)

4 step-type these commands

./ufonet --download-zombies

./ufonet --gui

5 step-You can figure the rest out.

INCASE- ./ufonet --help

type that in for extra assistance.

You can thank me later.
