Thread: [Blackshades scam](#)

Wizzit - October 11, 2012, 6:02 pm

UPDATE: After everything they figured out I DID purchase blackshades:

Issue resolved. because they found my payment and offered me the product.

--

Bought Blackshades NET over 2 years ago, had a break for about a year, tried to get HWID reset and new product link and after 4 days of terrible support, have been banned from bshades.eu and told to go on my way.

Here is the support for the last 4 days:

Claims he can't find my payment by email address asking for receipt... from over 2 years ago??? however it's clear I had the product, otherwise how the fuck else did I have my HWID reset?!?!? Genius...

Tickets proving I had HWID reset (August 2011 not 2012 fyi)

Then just now without warning, this:

Lifetime clearly doesn't mean lifetime, it means until they decide they can't be bothered to support anymore.

Avoid Blackshades like the plague.

Edit:

Unless you all believe that including the proof I had my HWID reset on blackshades, that I planned this from over 1 year ago and plotted my posts around so that 1 year LATER I could scam a \$30 program? Then see this too:

<https://hackforums.net/showthread.php?tid=1641595&pid=15276008#pid15276008> (second post down, me stating there is a problem with the auto updater, for blackshades).

I think I've given sufficient proof without a receipt that I had blackshades.

Orgy - October 11, 2012, 6:12 pm

holy shit, you spammed the hell out of their ticket system. i'd have banned you too lol

Advanced - October 11, 2012, 6:14 pm

Do me a favor, and show me where you posted payment proof.

Yeah man. You give me thread links & ticket links as payment proof?

Here's my payment invoice & a screenshot:

Well take this as a learning lesson.

Take care of emails and proof of shit you may need later.

Also, you spammed the hell of out them.

Advanced - October 11, 2012, 6:23 pm

You mean this HWID reset?

So uh... what's your order ID?

Paradoxum - October 11, 2012, 6:35 pm

I just cleaned the thread. Why can't you two discuss properly? Stop cussing and flaming or it will be unpleasant for the both of you.

My apologies if I was cursing. Although, it's quite obvious that I wasn't the one cursing..

Nah they aren't my tickets are they. Anyone with at least an ounce of intelligence please look at the dates on the ticket main page, and the ticket posts (in my images) and confirm clearly they are my tickets. The fact he is now claiming they aren't my tickets all of a sudden is even more proof he's

scamming.

You posted that they weren't your tickets & your post got deleted along with mine. Let me introduce you to something called "sarcasm".

Since when did business ethnics mean to give you a free copy of Blackshades NET?

I spent hundreds on products sold on HF (points to rep), why would I need to scam a \$30 PoS that's already out there free?

Oh...did I plan this over a year ago, and think to myself (Oh let me plan a year ahead so I can get a free blackshades worth a whopping \$30 1 year LATER??)? Really? lol GTFO:

Yes I planned this from over a year ago, I really thought this one out eh? Hows that for sarcasm?

I'm done here, clearly this guy has ejected me because he wants to ignore all proof and only accept a receipt, it's completely clear I had the product even to someone simple minded.

What are you trying to imply? I'm asking for some sort of payment information, what you gave me was completely irrelevant. I don't see why you think you're conscientious & trying to rationalize. Oh, and sorry if I'm not simple minded.

What am I thinking? You were using cracked Blackshades all along.

<https://hackforums.net/showthread.php?tid=2933440&pid=27185994#pid27185994>

So why don't you stick to your shitty cracked version, that you're "entitled to"?

And your support team would reset my HWID on a cracked Blackshades? hahahahaha you are genius. Loving this, the more you post, the more your nonsense is showing through.

And why would the updater run on a cracked version of blackshades? that makes no sense whatsoever.

Advanced - October 11, 2012, 7:08 pm

Zeon was a horrible staff member. What doesn't say that he was trying to boost his earnings by posting that? After all, you have NO PRODUCT INFORMATION whatsoever.

iHaX™ - October 11, 2012, 7:10 pm

I'm siding with Advanced. I've never had issues with .NET or their staff. Since you're talking about using a cracked version, they have every right to deny you service.

I've gotten all my stuff situated out within 10 minutes of posting a ticket.

Sorry for your loss. Bshades has terrible support and backdoors in there rat's they can steal your slaves ! and had a hidden bitcoiner miner on all the slaves. Hope you get your money back or issue resorted ! I would never go with Bshades would of been better off with darkcomet.

You could have just added that note, it even shows you have the option to add a note in your screenshots lol.

The point is HOW would he have reset the HWID on a product not purchased? Ok let me break down because you seem clueless... a database has tables right? So how on earth would anyone be able to reset my HWID in your database if my user, password, and current HWID did not exist inside the database? You're stooping so low now as to say that your support team were in on some elaborate scam to bag me a free \$30 program 1 year later? LOLLOLOL what else next? Perhaps try blaming me for backdooring your RAT? I'm looking forward to your next post, they are making me laugh.

The fact I posted a scam report shows that I already know that. I'm just defending myself and warning other possible BS buyers that they should beware.
