Thread: [\[TuT\]How to Make your own DDos attacker in VB2008\[TuT\]](#)

GerraT177 - March 1, 2010, 10:11 am

Hi guys, In this Tutorial will i teach you how to make a very simple application. A DDos attacker In VB 2008!

::What is a DDos attack?::

A denial-of-service attack (DoS attack) or distributed denial-of-service attack (DDoS attack) is an attempt to make a computer resource unavailable to its intended users. Although the means to carry out, motives for, and targets of a DoS attack may vary, it generally consists of the concerted efforts of a person or people to prevent an Internet site or service from functioning efficiently or at all, temporarily or indefinitely.

Things you need:

Visual basic 2008

A Brain would be useful

Some basic skills

So now lets start!

Let's start with making a new project and name it whatever....

Now you'll have to add the following to the form

Add a button and change the existing text to "Send packets"

Add another button change the text to "Stop packets"

Add a textbox

And finally add a timer and change the interval to 240

Now design your form a little so it looks neat and nice

Mine looks like this....

[img]http://img31.imageshack.us/img31/3463/namnlisx.jpg[/img]

Ok, so now when we have designed the form let's start with the coding!

First you'll have to double click on button1

And add this code

Code Timer1.start

Now lets click on button2 and add this code

Code Timer1.stop

Now let's write in the timers code..

Code shell ("ping " & (Textbox1.text) & "-1" & "65000")

There you go you have just made your first DDos attacker! ???

What does timer1's code do??

Well Basically it does just open CMD and writes in the code that people often write in CMD to DDos attack a site!

Credits: Me! ?

[warn]

And if you are a Vb pro please don't say like "LOL So daim easy!"

Becuse there are actually beginners in this forum too ?

Best Regards Fernando

This is simply the worst program ever,creating this program is completely useless.

i agree you dude will not got any profit dude from this programme any how nice try dude can you make some pro TUT

English please.

Back On topic : pinging is not goin to hurt the server, or over load it. so the tut is compleatly useless. but you made some effort writing this, so keep the spirit up ^^

?

Exactly,

This also wont affect any website

???

TheBlackMarket - March 1, 2010, 12:05 pm

Thanks for sharing this to Us Dude.

Joey K - March 1, 2010, 12:10 pm

1. That is reputation abuse

2. This is not a ddos attack tool

0xE9 - March 1, 2010, 12:25 pm

this is a dos tool , (a single dos)

a ddos is a distributed dos using other victims computers to dos with you, therefore its a ddos

Guys, i'm sorry if i was wrong but when i saw a youtube video on how to DDos attack a site. I made so program does the same and types it in to CMd just as the guy in the youtube video did.... I'm very sorry. I didn't know that i was going to get warned for a TuT Is there any way to delete this thread?? :-[After im done that im going to quit SeYa guys... :(Make sure to rate this thread 1/5 for a bad work :(

HaXZX0r - March 2, 2010, 8:03 am

Dude, Just as Miharbi-DoNo says that code won't do anything, But nice try thought..

Clutch - March 3, 2010, 3:00 pm

Just so you know, DoS != DDoS

Please, use the search button for a booter or something.

OP, how dare you call this a DDOS'er. Shame on you.
