Thread: [google dorks sqli](#)

zonfibra - October 13, 2012, 5:44 pm

Hi

I'd like to know if have a dork to search only things of one country

for example: to sqli i use "you have a error in your sql syntax site:com" and this search all sites .com but i only need about my country

its possible?

Greetings.

I think you can only sort b country domain eg. ru but no I don't think there is a dork for only certain countries.

really?

suspicious searches? as well?

Greetings
