Hey HF,

This is my 7.Tutorial.

So randomly i found that Whatsapp get stucked if you write a message (dont know exactly but at least longer then 400 Chars) xDD.

I made a new Group in Whatsapp and invited all my friends.

For best result install Whatsapp on your PC (Bluestacks).

I dont will make a Tut how to make this because its very easy!

Then i wrote "HAHA" copied it and pasted it about 10 minutes in my Editor.

Haha xd

after this procedure i copied it all and pasted it on my Bluestacks Whatsapp Player.

The result was all my friends couldnt start whatsapp.

They needed to reinstall it.?

if they open the chat they display got stucked and always got a message to close the Programm.

The names arent showed correctly.

And so so so ...

I loved it hehehheheheh <33333

Please dont write any bad comments !
