Thread: [Need A Little help - Experienced RAT'er here JUST CONFUSED :p](#)

Noah™ - October 19, 2012, 1:52 pm

hey dudes

basically the story is that im using darkcomet v5.3 and one day i have about 200-350 slaves one day and i can view everything fine. then the next i wake up turn on my laptop and find that boom all my slaves are gone vanished. every single one. i find that all my ports are open and it should be working however when i check my own server to see whether I pop up on my RAT it doesnt show.

please help as i recently got back into RAT 'ing and was getting really good at spreading and enjoying the fun/details i got from it. now it suddenly stops working. if no one here can help i guess i will have to format my PC and get controlmeRAT but i want to see what is the problem first

many thanks

-black

Maybe your firewall randomly turned on?

That happened to me once, closed it and the slaves started poppin'.

Noah™ - October 19, 2012, 2:21 pm

just added loads of rules (i thought as the file path has changed but to no avail, any help??)

chippydog - October 19, 2012, 2:28 pm

It could be your firewalls, or maybe the server got deleted on your computer somehow? I'm not an expert in this at all, just giving suggestions.

-Cheers

First make sure that your no-ip working corectly..

2. make sure your port is open
- 3.scan your server to see if is FUD/UD

p.s u had bought all these slaves?

Jesusisking - October 19, 2012, 3:33 pm

You make sure that your router is pointing to your current machine?

Noah™ - October 19, 2012, 3:33 pm

I had not bought no used a YT fifa 13 spreading method. Also it turned out i needed to update the filepath on The firewall so its all good and working now! Offering free help + advice for port fowardinf FWB and other setup of RAT's frew now so PM me
