Thread: [Source Release\] C# HWID Generator](#)

johndoen001 - March 2, 2010, 3:25 pm

Well while starting to learn C# now (Yea, jumping on that band wagon), I decided to first learn how to make some HWID stuff due to a request from a friend for his own program. So now I will release the project to you guys for your own use. If you decide to use any part of this code I only ask that you give me some credit (Not that its really anything special and if you feel strongly about it not required :P). Its not terribly well coded but it works.

Update: Fixed Bug, lolz, please know that Tick Count is not an effective way to generate a hwid as it changes constantly....:P

Code Download Link: <http://www.mediafire.com/?gydmyz4tmdt>
Information Gathered: Host Name/IP

Computer Username, Machine Name, OS Version, Processor Count, Tick Count

Motherboard Serial

MAC Address

Volume Serial ["C" Drive]

Enjoy

Great :) John the beast is back ahah

johndoen001 - March 2, 2010, 3:42 pm

lol

Though I am concerned about the beast part....

lajcik - April 10, 2010, 7:38 am

I downloaded source file. Can you tell me how to put this code into my programme ?

I need to make something like authorisation before run programme. I must activate someone`s code.

Dorfmidge - March 8, 2015, 12:17 am

Good job this looks cool, and a good project idea
