Thread: [\[Custom Source\] Custom Coded Booter + Several Features and Affordable \[Custom Source\]](#)

**MOD3M** - October 22, 2012, 5:03 am

I am selling a custom booter source that I payed almost \$600 for originally. I simply don't have the time for a booter, so I decided to sell it (to multiple people). I am also willing to sell all rights to one person, but that has a steeper price.

I think I have seen that source before. I don't think you coded on your own.

Dude you absolutely gotta change the font color of that grey with the blue background. You can barely read the text.

This is an old source leaked around. It was Khaotic Booter's source.

So your selling back a booter source that belong to you and it was leaked ?

First of all, I was the owner of Pressure Stresser. I worked with Tibit, that is how I obtained the source. So, please, don't say I got a leaked source and then am trying to sell it. It's degrading.

Considering how leaked this source is, it doesn't matter if you got a leak copy or not. It is still massively leaked.

I was not even aware of that. I will just close the thread to prevent further controversy.
