Thread: [Amazing Rat Kit! Includes Encrypter, Cyber-Gate Rat, And Binder!](#)

?IvNet™ - October 22, 2012, 6:52 pm

Hey guys im here with a thing that everyone LOVES to use! RATS, Remote Administrator Tool. RATS give you pretty much full access over a computer letting u to do almost anything! some of cyber-gates functions (RAT thats included) are...

Spoiler ([Click to View](#))

Managers:

- File Manager
- Process Manager
- Service Manager
- Device Manager
- Window Manager
- Regitry Manager
- Installed Programs
- Active Port list

Spy:

- Screen Capture
- Webcam Capture
- Password Recovery
- Keylogger
- Audio Capture

Network Tools:

- Socks 4/5 Proxy
- HTTP Proxy
- Send File
- Download and Execute
- Open Webpage
- URL Redirection

Extras:

- Dos Prompt
- Quick Search (for logs)
- Chat
- Extras (open-close CD-ROM etc.)
- And Alot More!

In this kit we include the rat with the features listed above and a encrypter, which blocks virus protection without it no one will download it. the encrypter is not FUD buy a FUD encrypter or find one if u want u can give me one ill add it :D.

Also this pack includes ebooks on how to portforward and how to set everything up :D and ofcourse another very important part of the RAT a binder make the program more releastic and less suspicious by binding it to a REAL file and encrypting and spreading!

How to get:

- First need to post bellow asking for it.
- Then pm me asking for it and ur done!

VOUCHES:

None Yet...

Any problems or bugs PM me! Ill fix them ASAP!

it says its infected because of the RAT Cyber-Gate like alot other RATS has a builder built into it if u want run the file using Sandboxie or a VM i promise u this is no virus! Also the binder and encrypter may be detected as viruses i promise u they are not!

(Oct 23, 2012 11:19 PM)Perfect Cell Wrote: [\[CITE\]](#) Virustotal scan please I don't want to get infected againim not sure if i replied yet but if i havent here u go i will not supply a virus scan because it will show its infected but its not it shows that cause of encrypter and binder and cyber gate the RAT (cyber-gate) is a control panel and a builder which means it makes the virus to give out and ofcourse RAT's are viruses and for the builder to work the cyber-gate must have the "bad" code in it if u want run in sandboxi or in a VMware

Jexocion - October 26, 2012, 3:41 pm

seems l33t would love this send me link pmin u now...

EDIT: Great kit bra! love it gonna be using alot VOUCH keep up the good work
