Thread: [AdFoc Bot \[AUTO\] Direct Link \\$300/mo easy... No Survey! Proxy Support!](#)

acj - October 25, 2012, 12:10 am

After a lot of searching, buying, emailing, and just plain trial and error, I've found this bot to be among the best.

Not to mention one of the only ones I could find on this forum without a virus. ?

Cheers to the creator!

This Bot is unique because it has a network of 20-50+ users at any given time.. It will click network links ~20% more than it clicks your links, as does all other bots, so it evens up and promotes randomness..

More people, More randomness, the better the log will look to adfoc, and the more \$money\$ we will all make.

What would you do with an extra \$300 in your paypal account every month??

If you are starting a new AdFoc Account
please use my [Referral Link To Get You There](#)
? Don't forget!

bot version 1.5.4

[\[img\]http://s9.postimage.org/nbkxr758v/asdasdd.png\[/img\]](#)

requires x64

Be sure to use server 2, the other one doesn't work

Links

Not going to tell you how to make adfoc links... you should be able to figure that out... use a file hosting site or something like that...

Proxies

Use good proxies! or if you don't want to or don't know how buy Hidemyass.com pro VPN and set the auto random ip changer to around 10 minutes.... Don't just run it on your open internet!

Minimize the amount of times you log into your adfoc account, as tempting as it is to check all the time, this gives you protection from getting banned..

When signing up: Besides using my referral link,? Use 100% real info to be sure there aren't

complications when it comes time to get paid...

Sought - October 25, 2012, 1:29 am

Hey can you please re-upload your download link as its not working, thanks.

Weskk - October 25, 2012, 2:10 am

Are you serious?

Your download link is an endless circle of non-unique visitors, how does that even help you?

Edit: I actually reached an end, downloaded, Adfocus_v154_x64.exe doesn't work for me but maybe it will work for others.

acj - October 25, 2012, 2:14 am

It is fixed, there should only be one adfoc link to click and then an instant email to you..

If you are legitimately having issues with the download link pm me and ill send you direct link.. but the one in this thread still works for me so i'm leaving it

qwwwupp - October 25, 2012, 2:36 pm

Does this really work? Anyone vouching for it now being a virus / scam?

Tried it, does not work. On server 2 and server 1, it says there are no people, and when trying to use it, it says "Adding links to network..." then becomes unresponsive and crashes.

puremindd - October 25, 2012, 5:29 pm

Is there really not any x86 version out there? Man, I'm too lazy to reformat my vm..

-Illusi0n - October 26, 2012, 2:36 pm

Shit bot. It goes to your first link, then doesn't go to the next.

acj - October 26, 2012, 3:32 pm

im watching mine go through all links..

Badside416 - October 26, 2012, 4:05 pm

blue++ - October 29, 2012, 10:26 am

I'm just wondering..

acj - November 8, 2012, 8:38 pm

Someone took my referral link and got 500k clicks and made me 300\$ in the last 12 days. That means they made like 1800\$ in 12 days.

sgriffin - November 20, 2012, 1:42 pm

I get the download link just fine. Once i get to filehosting.org to download it nothing happens when i click download :/

purekorova - January 14, 2013, 7:13 pm

also big vouch for this guy it works great!

Helroos 2 - July 7, 2013, 5:02 pm

Well, why download link is on #? You have a bot for that, it's suspicious >_<

Why i need to add proxies if it's server side?!?

Officially dislike it.

It uses my own pc:

-Needs proxies

-Needs user-agents

-Needs referrals

-You can show/hide browser

Why is there server stuff?

Prestigio - July 7, 2013, 7:40 pm

skript jonson - July 7, 2013, 11:42 pm

Not working for me man. It says I have the wrong link.

hgsaf5 - July 8, 2013, 10:45 am

Awesome thanks for the sharing this :P

Killcam - July 8, 2013, 10:47 am

I had a bot exactly like this, this might be the same one.

I had a total of about \$14 in my Adfocus, and they refused to pay me.

It got detected. I'm supposed to appeal it, but I'm not worried about \$14.

Watch out when you use these type of things for them though. ;)

skript jonson - July 8, 2013, 12:02 pm

Works amazing! Thank you! I would rep you if I could

SIM-1673779 - July 13, 2013, 10:03 am
