Thread: [PageControl v1 - Animated sliding between pages](#)

BlackCap - October 26, 2012, 12:54 pm

The PageControl is a sexy alternative to child windows or something. It lets you slide between UserControls with a sweet animation.

It also have it's own design-time designer which let you place the pages in a table. The animations can go both horizontally and vertically.

EDIT:

I created a tutorial on how to use the control in your own projects:

Looks nice! :) Getting it right now. Good Job BlackCap

gungunfebrianza - October 26, 2012, 6:13 pm

sir black cap, you are the great control maker. if i'm open this project in visual studio 10 are this will still compatible? i see you create this project in visual studio 12

Percocet - October 26, 2012, 6:15 pm

Dafuq? You should add a video so I can see what you mean. Other than that, nice release.

Kotei - October 26, 2012, 7:46 pm

This is pretty sick. Thanks for this BC. :3

I suggest you to reupload this picture because I don't know how long this website will save it.

EDIT: Oh damn, someone is faster than I am lol xD

xSilent - October 27, 2012, 12:17 am

Not bad. Not bad at all. ?

ytlayol - October 27, 2012, 12:54 am

That is one sick project...welldone boi...keep it up

I'm sorry, but I had to as you beat my first PageControl, and I hated that none of them had design-time support.

GrOwlit - October 27, 2012, 5:12 am

Beautiful, is the only word that i can say

FOUNDER - October 27, 2012, 6:20 am

5 star rating. Good work as usual :)

nuk - October 27, 2012, 9:46 am

very very nice indeed! :) a lot smoother than the one i wrote (well attempted to anyway LoL) a few months back... always a pleasure & thanks for sharing :)

Doctor07 - October 28, 2012, 2:05 pm

Very nice release! Haven't seen anything like it before xD

SkyRider2 - October 28, 2012, 2:44 pm

Very cool, Sleek and smooth transition. Great work mate.
