yes there are like several codes to make your status blue, I just posted one of them,

how it works is that you can set the link to a page or you can set it to default. One I posted was set to default. You can also specify which fb page you want to send someone too the minute they click the link text

neil5050 - November 24, 2012, 12:33 am

Its really easy concept how the big picture one works.

If you want to learn how to put a normal picture in chat without using the link

you can take someone's facebook lets say

www.facebook.com/nololthisismyname

^^ lets say thats your facebook url

in fb chat type Code `[[nololthisismyname]]`

or go to nololthisismyname

<http://graph.facebook.com/nololthisismyname> and this should give you the facebook id
in fb chat type Code `[[your facebookid]]`

axmetmcl - November 24, 2012, 2:10 am
