Thread: [\[Tutorial\] How to set-up Emissary NET \[Tutorial\]](#)

Ninja - October 27, 2012, 7:59 am

Links

[Emissary NET](#)

[No-IP](#)

[7-Zip](#)

No-IP

1. Create a account at no-ip then you will see a page and click add a host.

[IMG]http://i1359.photobucket.com/albums/q785/mobiliz/Screenshot_7_zps56247a0b.png[/IMG]

2. Make your host (no-ip.biz is best).

[IMG]http://i1359.photobucket.com/albums/q785/mobiliz/Screenshot_8_zpsae9b6e37.png[/IMG]

3. Click download client at sidebar of webpage and then download the client and then install it.

[IMG]http://i1359.photobucket.com/albums/q785/mobiliz/Screenshot_9_zpsecd26264.png[/IMG]

4. Login with your email + password and select hosts then check the checkbox on which one you want.

Emissary NET

1. Buy emissary NET (If haven't yet), download it, extract it then open it and login with the account you brought it with.

2. Go to settings tab then add a listening port by right clicking the the listener box and adding one then press start server. On connection tasks I just add refresh but I got told to and it a good idea to.

[IMG]http://i1359.photobucket.com/albums/q785/mobiliz/Screenshot_1-2.png[/IMG]

3. Go to builder tab then create a profile or use the default profile that is already there.

[IMG]http://i1359.photobucket.com/albums/q785/mobiliz/Screenshot_2.png[/IMG]

4. You should be on the connection tab now, Add your no-ip address and also add the port you are using. Click the next button.

[IMG]http://i1359.photobucket.com/albums/q785/mobiliz/Screenshot_3.png[/IMG]

5. You should be on the installation tab now, Check enable startup then add the files you want to be created in the textboxes. Then press the generate button a few times so the textbox for mutex will change, check the other 2 textboxes (if not already) if you want to. Press the next button.

[IMG]http://i1359.photobucket.com/albums/q785/mobiliz/Screenshot_4.png[/IMG]

6. Check save profile then press compile, after a few seconds you will get a prompt to save the server file then save it where you want and you are done.

[IMG]http://i1359.photobucket.com/albums/q785/mobiliz/Screenshot_5.png[/IMG]

7. You are done and ready to spread.
