Thread: [Some simple Tricks to watch webcam online with google](#)

Paranoiaaa - October 30, 2012, 7:12 am

Hello HackForum users! [Sorry if this is the wrong Section but I dont know where to place it order..]

Okay fine! I was boring on the internet, reading some forums ect!

I had found a way how to look live in a webcam only by using Google, and codes!

Im gonna explain it today. I think that most of the Hf'ers already now this stuff! But for the users who did'nt, I will explain!

Its very easily!

What did you need?

- All what you needed for this trick is, google searchbar and Java Plugin to view video's. [Most browsers have already Java.]

Alright!

First go to Google search website (www.google.com) and typ the following texts in Google Searchbar.

"inurl:/view/index.shtml" [Without Quotes]

You can copy and paste the link, so you don't have to typ it all!

Click on enter and Google will found some links like this:

[img]http://imageshack.us/a/img407/8096/screen1lq.jpg[/img]

Than you get the links ect. They are click-able.

If you click on the link you get something like this!

[img]http://imageshack.us/a/img831/4194/screen2xf.jpg[/img]

[img]http://imageshack.us/a/img203/4831/naamloos3b.jpg[/img]

Note: If u type the IP address of the computer in place of inurl then the web camera of that computer can be "hacked".

Example: Here is an example of the search. Your query will look something like this:

207.111.165.30/view/index.shtml

The above search query will show webcam used at that IP address.

The other Google search links which makes web cameras publicly viewable are as follows:

inurl:/view.shtml
intitle:"Live View / – AXIS" | inurl:view/view.shtml^
inurl:ViewerFrame?Mode=
inurl:ViewerFrame?Mode=Refresh
inurl:axis-cgi/jpg
inurl:axis-cgi/mjpg (motion-JPEG)
inurl:view/indexFrame.shtml
inurl:view/index.shtml
inurl:view/view.shtml
liveapplet
intitle:"live view" intitle:axis
intitle:liveapplet
allintitle:"Network Camera NetworkCamera"
intitle:axis intitle:"video server"
intitle:liveapplet inurl:LvAppl
intitle:"EvoCam" inurl:"webcam.html"
intitle:"Live NetSnap Cam-Server feed"
intitle:"Live View / – AXIS"
intitle:"Live View / – AXIS 206M"
intitle:"Live View / – AXIS 206W"
intitle:"Live View / – AXIS 210?"
inurl:indexFrame.shtml Axis
inurl:"MultiCameraFrame?Mode=Motion"
intitle:start inurl:cgistart
intitle:"WJ-NT104 Main Page"
intext:"MOBOTIX M1? intext:"Open Menu"
intext:"MOBOTIX M10? intext:"Open Menu"
intext:"MOBOTIX D10? intext:"Open Menu"
intitle:snc-z20 inurl:home/
intitle:snc-cs3 inurl:home/
intitle:snc-rz30 inurl:home/
intitle:"sony network camera snc-p1?"
intitle:"sony network camera snc-m1?"
site:.viewnetcam.com -www.viewnetcam.com
intitle:"Toshiba Network Camera" user login
intitle:"netcam live image"
intitle:"i-Catcher Console – Web Monitor"

I hope you will enjoy this tricks. And remember, this aren't Hacks, it were just some funny Tricks!

[The url's etc are not finded by me! So I will not take credtis for the codes.]

Have fun!:) [I don't know if you can see the pictures, I have uploaded it with imageshack. So here are the picture links.

Good Tutorial for noobs who dont know anything about it!!
But add some pics ;-)

Paranoiaa - October 30, 2012, 7:21 am

Oke, did you have one moment? Im gonna take some pictures, and I will add it on the thread! Thanks for the feedback:).

Freerunning - October 30, 2012, 7:23 am

Your title is misleading :) kindly change it.

ZuGgY - October 30, 2012, 7:23 am

Thanks for this, I will try it out later! xD

??g??z??z - October 30, 2012, 7:23 am

I don't quite understand why it needs Java, I think this could all just be a big hoax.

This is just my opinion, but if someone wants to test it, then go ahead.

Paranoiaa - October 30, 2012, 7:26 am

(Oct 30, 2012 07:23 AM)??g??z??z Wrote: [\[CITE\]](#) I don't quite understand why it needs Java, as far as I can see, you have 104 posts, joined last month and you're trying to infect members.

Omg.. You don't have to download some stuff. Try it out without Java? You will see that I don't want to Infect people.. Search about it @google? But, If you dont trust it, don't do it.

I am not here to infect people..
