[img]http://image.noelshack.com/fichiers/2012/47/1353835784-blacknixrat-thread.png[/img]

Vouch

Quote:SafranUSA: Vouch for this product, legit seller.

You can trust this RAT.

Quote:censored: Vouch for Inferno666. Legit business man.

This looks great man.

?SafranUSA - October 30, 2012, 2:14 pm

Vouch for this product, legit seller.

You can trust this RAT.

.Prince - October 30, 2012, 2:21 pm

hi , what are the available ddos commands , seems nice ..

Razza™ - October 30, 2012, 2:21 pm

Looks like a very nice product, Good luck with sales bro!?

But change the logo it says "Free".

elmedoc - October 30, 2012, 2:22 pm

@.Prince

UDP Flood at the moment.

.Prince - October 30, 2012, 2:26 pm

it would be nice if you add them all , especially HTTP GET / POST .

the.xAx - October 30, 2012, 3:48 pm

The product looks great.

very good work

Respect for you ;)

DELPHICODEZ - October 30, 2012, 3:51 pm

Vouch for Inferno666. Legit business man.

This looks great man.

elmedoc - October 31, 2012, 2:23 am

Thanks for your vouch guys :)

I'm search people who can make good video for my rat. (can use after effect ect..)

I can paid or give license of blacknix rat 1.6 for this people.

Harold Wren - October 31, 2012, 4:33 am

Vouch for this programmer, does this work even on mountain lion.. The client not the server

Donrulezz - October 31, 2012, 5:01 am

if this rat can handle up to 5k bots let me know i will buy it?

you will have to provide proof it can :D

or you should make a bot holder in hf very much people will need it.

should have dl & execute update file inject and start-up . no need of webcam and screencapture.

i am sure many people will buy that :D

elmedoc - October 31, 2012, 9:03 am

@DonRuleZZ

BlackNix is very stable :)

You can hold 5k if you have good home connection.

They have dl/execute, update and the server inject/startup with persistance/anti-botkill. They have small rootkit for processus so he can't be kill (because the rootkit hook the kill command)

Viraavy - October 31, 2012, 9:20 am

Server is FUD or we shall have to crypt it.

elmedoc - October 31, 2012, 11:49 am

@limposhare

You need to crypt it.

But all crypter who you can find in the market work with :)

Ex22 - October 31, 2012, 4:47 pm

im trying to pm you my information but some thing wrong

btw MY HWID : 2471649559

Email : m.alabdaly@hotmail.com

Regards,

?Dubstep - November 1, 2012, 2:06 am

Hello everyone, Inferno666 has a temp ban for one week, so if you want to buy his products please send me a private message, I will then send you his skype.

DELPHICODEZ - November 1, 2012, 2:36 am

Can you please inform me as to why he is temp banned..? Thanks.

?Dubstep - November 1, 2012, 2:42 am

He told me he is temp banned because he has alot of threads on the market, it's bullshit yeah, he got banned for nothing :/

blablasoft - November 1, 2012, 2:42 am

Hi i am friend of Inferno666

He is banned by robot because he has alot of threads on the market :O

If user want contact the coder for get update or buy the product. PM me i can give to you the skype of inferno666

BottomNotch - November 6, 2012, 10:34 pm

Well it looks like someone is stealing our bots-_-

ezeeprofit - November 7, 2012, 12:36 pm

(Nov 6, 2012 11:34 PM)BottomNotch Wrote: [\[CITE\]](#) Well it looks like someone is stealing our bots-_-

Can you explain what you meen ?? Is it stealing botts like bs ??

Also op you say it un-killable can you tell us what bots you have ussed to try and kill this ??

Looks good

BottomNotch - November 7, 2012, 4:09 pm

Looks good

So: I build the rat, then run it on anibus...

That is my results... The censored one is my dns but the windows one his apparently his since i don't own that no-ip address-_-

elmedoc - November 8, 2012, 12:19 am

@BottomNotch

Don't said shit you didn't have buy the rat.

BlackNix 1.6 use geoip.dat so they don't have connection.

@ezeeprofit

I have try to botkill with blackshades,host booster 5,insomnia,emissary.

And they have nothing happens :)

@All

You can buy now with Liberty Reserve and PayPal.

Owl City - November 8, 2012, 12:24 am

Is the botkiller 100% effective? If it is, I'll get this :)

elmedoc - November 8, 2012, 12:25 am

@Dimsim1234

Yes :)
The botkill is very strong :)

BottomNotch - November 8, 2012, 12:27 am

Fine fine fine... True true true...???

Well GLWS then...

elmedoc - November 8, 2012, 12:30 am

@All

BlackNix 1.7 is release to all customers :)

Owl City - November 8, 2012, 12:34 am

Thanks, received the RAT; I love the GUI :)

elmedoc - November 13, 2012, 8:37 am

@Dimsim1234

Happy ratting with blacknix rat :)

James Bond™ - November 13, 2012, 9:23 am

If I obtained BlackNix from the last seller, am i eligible for updates?

elmedoc - November 14, 2012, 3:18 am

@James BondTM

PM me, i will give you my skype contact.

blablasoft - November 14, 2012, 4:38 am

Nice support :)

You should make new thread design.

elmedoc - November 16, 2012, 11:38 am

Yes i think to contact people for make good GFX for this thread.

TooDizzy - November 16, 2012, 3:47 pm

Looks really nice man may ne buying soon

elmedoc - November 20, 2012, 12:51 pm

@TooDizzy

If you need any demonstration i can you show by teamviewer or join.me, just contact me by PM.

Nozzo - November 20, 2012, 1:27 pm

Is a good rat but I wait the cracked version of it ?

elmedoc - November 22, 2012, 1:00 pm

@SLELETOR

Hmm serious... You should paid if you want clean version and update :)

kriptonhaz - November 22, 2012, 1:08 pm

the feature said sock5 is that mean we can use the slave as a proxy so we can use their ip for browsing on the net? how about the slave is connected behind the router? I need more detail before buy this.. thanks and glws man.. :)

elmedoc - November 26, 2012, 9:33 am

@kriptonhaz

Just open port in the router and open service sock5 on the slave.
So you can use the slave like proxy.

The sock5 is more better than other RAT like cybergate,blackshades ect... because it's use UpNp if UpNp is enable for open port :)
(Normally UpNp is enable by default in all Box/router)

@All

BlackNix 1.8 is release and send to all customers.
Server size is more small :)

benternet - November 26, 2012, 10:18 am

I see this has a keylogger and grabs saved passwords from firefox ect.
but what about outlook/email client passwords?

elmedoc - November 27, 2012, 9:56 am

@Benternet

All password can be easy steal with no problem.

kriptonhaz - November 28, 2012, 7:28 am

(Nov 26, 2012 10:33 AM)Inferno666 Wrote: [\[CITE\]](#) @kriptonhaz

(Normally UpNp is enable by default in all Box/router)
thanks for your feedback.. but I don't have any access to the remote router, is that any feature like reverse proxy or something like that? if so I'm gonna purchase this asap.. :)

elmedoc - December 5, 2012, 2:12 am

@kriptonHaz

This feature isn't add at the moment but i will look on :)

@All

BlackNix RAT 1.9 is release :)

rangasux - December 5, 2012, 3:02 am

what cryper do you use to crypt this?

Thanks in advance.

elmedoc - December 5, 2012, 10:33 am

@Rangasux

Some customers use Data Protector with it.

iUpgrade - December 5, 2012, 10:51 am

Does the stealer steals bank logins ? also i want to install it on 2 pc`s means in day i can access bots from another pc and in night i can access bots over my home pc, is it possible ?

Last and the most important thing i want to see the screenshots of keylogs of Keylogger and password stealer.

elmedoc - December 5, 2012, 10:55 am

@iUpgrade

Yes he can.

About your ask, blacknix can be installed on any computer, no dependacies, you can also add any number of DNS-IP/Port.

And the server can connected to 50 connection in the same time, so you can build server who connect to your Computer Home and you other Computer.

You can also move your botnet to other computer,dedicated server ect...

PM your skype or your ICQ.

I can add you and show you the keylogger/password feature :)

lxxheatxxl - December 5, 2012, 11:10 am

How long do you plan to keep this project running?

What's this coded in?

Also, I have a few more questions, but I'll tell you on skype then. PM me your skype, or I'll PM you mine. However you want.

elmedoc - December 6, 2012, 11:09 am

@lxxheatxxl

Coded in Delphi and ASM.

I think running the project for long time :)

PM your skype

iUpgrade - December 6, 2012, 8:45 pm

Vouch for him !! just bought this and its working great, tested it and connection speed is great as compared to other rats.

Drug ballad - December 6, 2012, 10:36 pm

the fun thing is that u cant really have that name since its already a rat with that name i even got the source for that rat :P

elmedoc - December 7, 2012, 4:32 am

@Raccoon

I think you make mistake.

BlackNix != BlackNess ;)

The name look like but isn't the same name.

.Prince - December 7, 2012, 5:41 am

can we use this rat in VM ? looks interesting

Drug ballad - December 7, 2012, 5:44 am

yeah thats right it whas Blackness :P

LUIz

elmedoc - December 7, 2012, 5:47 am

@.Prince

Yes you can use the RAT in VM.

MiserAble - December 7, 2012, 6:23 am

well it looks good, keep on updating it and it will be HF top rat

good luck

elmedoc - December 10, 2012, 1:08 pm

@MiserAbles

Yes blacknix rat is going to be update for long time ;)
