PlayersTech - October 31, 2012, 4:43 pm

I don't believe this. It's VERY easy to send an email to yourself and save the contact name as "Facebook Security". A 13 year old cannot hack Facebook, if even full-grown adults with many years of experience fail at hacking Facebook. Also, you LIE right here:

[img]http://s11.postimage.org/sqoiedcpd/pic.png[/img]

You say you got \$2500 there, but in your post, you say \$2000.

razem - October 31, 2012, 4:46 pm

\$ 2000 is alot of money, congratz & enjoy.

gizmodo - October 31, 2012, 10:33 pm

(Oct 31, 2012 03:58 AM)ComputerTrophy Wrote: [\[CITE\]](#) It wasn't XSS. According to them, it's "Circumvention of our Platform/Privacy permission models". It was so flawed that it made the Facebook Pages app breach Facebook's own ToS.

I'm spending it on nothing. It will go to my savings account. Well, I'm getting a debit card from them. It's nice and flashy so I'm going to put my own money after taking the \$2500 so I can use it at stores. keep up the good work. congrats!!! keep walking in the right path.

I reported an exploit to Facebook on 28th September.

29th October:

1: Facebook Pages for iOS was approved

<https://i.imgur.com/P6vy4.jpg>

2: Filled out tax form to receive \$2000

<https://i.imgur.com/qnGTt.jpg>

At age thirteen (13), this makes me the youngest ever Facebook whitehat.

Can't wait to get my money. For those of you who say Facebook are denying your exploits, find a REAL one.

If this is true, I congratulate you ..at 13 I was just learning to wank lol

Aston Martin - November 1, 2012, 6:39 am

Ive only just got intrested in website hacking and such. Ive been reading guides and even though they are very well laid out etc its still hard for me to understand and im 19 ?

For a 13 year old to that that is amazing so i take my hat off to you man and enjoy that cash! ?

Angelic™ - November 1, 2012, 6:43 am

I don't think finding an exploit in a website like Facebook can be learned from tutorials.

gratz man, i'm not surprised that FB paid you, they are all about security :)

nice find

IIBAN - November 1, 2012, 1:49 pm

Good job bro, but you didn't "hack" Facebook.

Finding an exploit/vulnerability AND exploiting it to escalate your privileges in order to gain (full) access to 1/many FaceBook server(s) = hacked facebook.

Nevertheless, good job ;)

SIM-1073426 - November 1, 2012, 2:16 pm

That's sick, finding a exploit on Facebook at the age of 13? You got my respect.

It's funny how you're denying it; perhaps it's because you believe teenagers can't do anything? Yup, I believe teenagers can't do anything and I separate myself from the rest of teenage society, just to

be the living example of how teenagers CAN do something.

If you have seen my achievements on AstroP1D, you will know that I only brag when I've done it and not before or if it's a lie.

Please, go away if you think you want to unconstructively criticise me. I'm 15 years old... I'm not denying that teenagers can't do anything, I just didn't believe, but I don't really care.

Mormaii - November 1, 2012, 8:01 pm

Why do you feel the need to post your school and your age? Do you think it makes you better than the rest?

I think its great too! I couldn't do it. I think people are questioning if its legit because the imgur pictures. Message 3 of 5 says you will be receiving the 2000 via the card. Then message 4 of 5 states its open to the public and they will send out the bounty info shortly?

Mormaii - November 2, 2012, 3:57 pm

(Nov 2, 2012 03:02 AM)ComputerTrophy Wrote: [\[CITE\]](#) Come on, man! You're old on HF! You should know by now that people have bragging rights after getting Facebook or Google bounties!

Of course they do! and i congratulate them, i just don't see the need to clarify that you're 13 years old, age doesn't change anything here. It's what you can do, not how old you are that matters. Still, congratulations on the bounty and nice job.
