We are Admiral Arts.

A team of young, aspiring graphics designers who have many years of experience with Photoshop, Illustrator, and Cinema4D.

What you see above is merely a sample of our capabilities. We upload regularly and we aspire to become an established network on YouTube and YOU can help us achieve our goals. We have experimented with many different styles of design, and each of us have adapted to a unique style. We treat our art with great passion, and each piece is like a gem.

Our Creativity is limitless, endless, and infinite. We upload a variety of work ranging from breath-taking 3D designs, to logos, emblems, and Backgrounds (whether that may be YouTube or a Desktop background). We hope you appreciate the time and effort put into our work and rewarding us simply by being loyal subscribers. We have Graphic battles in the works and we promise you a variety of exclusive graphic packages.

For any further information, do not hesitate to pm me

This is sick, I wish I had the skills for this... Keep up the amazing work, also do you do YT backgrounds for others?

ButtholeSurfer - October 31, 2012, 3:07 pm

on the first im assuming you used c4d to do that? where might I be able to get my hands on some templates similar to that?

These designs are amazing, I really love the text and the colour of the blue you used.

If you guys like our stuff, please do subscribe. We will be making tutorials on C4D things like the logo above, and also photoshop tutorials for various photo-manipulations. Your views mean alot to us, because the larger our audience, the more we can offer you. We will also try and hold weekly package giveaways or PSD giveaways courtesy of your requests, and we hope that our graphic showdowns entertain you. At some point we will also be reaching out to the audience and inviting you guys to battle us. As i had mentioned before, the more you help us by subscribing and viewing our content, the more we can help you whether that may be by shoutouts or even featuring your work! :)

Thanks again for dropping by ?
