Thread: [? ?Capacity, Your Brain 2.0? ?](#)

Beauty - November 1, 2012, 7:09 pm

Capacity, the e-book that will change your life. I, the author of [Jump Start Your Brain](#) have decided to re-create what my vision was for this last e-book, my vision was, and continues to be, allowing individuals to take control over their own brain, to allow information to become easily absorbed to no longer have stress creating obstacles in their lives.

I've always been a firm believer that learning new things should be a main focus point in everyone's life. I believe that knowledge should be free, and that it should be readily available for those interested to learn from. The internet has made that possible, however there is still one thing holding you back, your own mind.

The main focus I will be covering in Capacity is how to free your mind from distractions, how to train it to stay on focus, improve studying to a further extent, and I may even dive into how to unlock aspects of your mind, to discover new things such as Lucid Dreaming, and Meditation.

What is to be expected:

?New, Intuitive information.

?Easy to read information, presented in a very appealing form.

?Free to little cost, and 100% original.

?Long, but concise.

?Life changing, if followed correctly.

?Well written, styled, and structured, as I always try my best to do.

?Please discuss, ask questions, suggestions, etc. below. You can talk about Jump Start Your Brain as well.?

Moopler - November 1, 2012, 7:51 pm

Jump Start Your Brain was a fantastic book, and you really know how to keep the flow going. I can't wait for Capacity, is there an ETA?

Not quite yet, I'm working on the first page and design aspects, I'll most likely have most of it done within the week, I have quite a lot of free time lately (:

I downloaded one of your eBooks, ([this one](#)), and it was probably one of the, if not the most high quality eBooks I've ever gotten from here. I can't wait to see what this is about ? Good luck!
