Thread: [I need someone to send me a keylogger builder that doesnt need net.framework](#)

tolisgreek - November 2, 2012, 4:27 pm

hey guys,,,i need a keylogger builder that doesnt need net framework for the compiled server to run! i wanna put to my gfs pc a keylogger but all the keylogger builders i have need net framework for the server to run,,and i dont have the required time to install net.framework to her pc,,so i need a keylogger builder that doesnt need net.framework for the server to run !

Many computers have .NET 2.0 already installed, I think since XP SP3 they all have it installed. So pretty much use any keylogger released here.

Just one question, why the hell you cant to keylogg your gfs pc?

Let her have her privacy...

I think all that you can do is download net :)
